**PCC.028/22 Construction of a second dwelling (double storey) to the rear of the existing dwelling at 2 Kirwin Avenue, Eltham**

---

*The following people addressed the Committee with respect to this item:*

- 1 John Alexander - Madison & Co (Permit applicant on behalf of the applicant)
- 2 John Fecondo
- 3 John Fecondo on behalf of Ken Titman
- 4 Joanne Fecondo
- 5 Emma Sampson
- 6 Stephen Guest
- 7 Elizabeth Guest
- 8 Lauri Widdup
- 9 Lauri Widdup on behalf of Hedley Widdup

<b>Recommendation</b>
-----------------------

**That** the Committee (under delegation from Council) issue a Notice of Decision to Grant a Permit to the land located at 2 Kirwin Avenue, Eltham for the construction of a second dwelling (double storey) to the rear of the existing dwelling, in accordance with the submitted plans and subject to the following conditions:

1. Before the development commences amended plans to the satisfaction of the Responsible Authority must be submitted to and approved by the Responsible Authority. When approved, the plans will be endorsed and will then form part of this permit. The plans must be generally in accordance with the plans submitted with the application but modified to show:
  - a) The existing vehicle crossing to Leane Drive retained or reconstructed at the same grade and location under the supervision of the project arborist to protect Council owned tree number 2.
  - b) A notation to state that excavation for the retaining wall posts must be undertaken with the supervision of the project arborist so as to not damage significant roots within the Structural Root Zone of Council owned tree numbers 5 and 6.
  - c) Tree protection measures in accordance with Section 8.3 and 8.4 of the arborist report by Taylors dated 26 November 2021, to protect Council owned tree numbers 1, 2, 5, 6, 7 and 8.
  - d) A landscape plan in accordance with Condition 3.
2. The development as shown on the endorsed plans must not be altered unless with the prior written consent of the Responsible Authority.
3. Before the development commences, a landscape plan to the satisfaction of the Responsible Authority must be submitted to and approved by the Responsible Authority. When approved, the plan will be endorsed and will then form part of this permit. The plan must show:

Planning and Consultation Committee Minutes

9 August 2022

6. Planning Matters

PCC.028/22 Construction of a second dwelling (double storey) to the rear of the existing dwelling at 2 Kirwin Avenue, Eltham

---

- a) A survey of all existing vegetation and natural features;
  - b) The area or areas set aside for landscaping;
  - c) A schedule of all proposed trees, shrubs/small trees and ground cover. This schedule shall include a mixture of selected from the Council document 'Live Local Plant Local' showing the botanical and common name of each plant, the quantity to be planted, the pot size and spacing;
  - d) The location of each species to be planted and the location of all areas to be covered by grass, lawn or other surface material;
  - e) Paving, retaining walls, fence design details and other landscape works including areas of cut and fill;
  - f) Appropriate irrigation systems;
  - g) Appropriate maintenance details; and
  - h) The provision of four canopy trees to be planted throughout the development. The trees must be substantial canopy species and selected from '*Live Local Plant Local – A guide to planting in Nillumbik*'.
4. Unless with the prior written consent of the Responsible Authority, before the occupation of the development, the landscaping works shown on the endorsed plans must be carried out, completed and maintained to the satisfaction of the Responsible Authority.
  5. No trees on site (unless specified on the endorsed plans) shall be removed, destroyed, felled, lopped, ringbarked, uprooted or otherwise damaged except with the prior written consent of the Responsible Authority.
  6. The Council owned nature strip trees must not be damaged during construction and must be protected in accordance with the tree protection measures shown on the endorsed plans.
  7. Prior to development commencing (including any demolition, excavations, tree removal, delivery of building/construction materials and/or temporary buildings), the trees marked on the endorsed plans as being retained must have a Tree Protection Fence (TPF) to the satisfaction of the Responsible Authority. The fencing associated with this TPZs must meet the following requirements:
    - a) Extent

The tree protection fencing (TPF) is to be provided to the extent of the TPZ, calculated as being a radius of 12 x Diameter at Breast Height (DBH – measured at 1.4 metres above ground level as defined by the Australian Standard AS 4970.2009)

Fencing may be reduced directly adjacent to the works area only to allow access during construction (i.e. no more than 1 metre away from the works/ construction area)

**Planning and Consultation Committee Minutes**

**9 August 2022**

**6. Planning Matters**

**PCC.028/22 Construction of a second dwelling (double storey) to the rear of the existing dwelling at 2 Kirwin Avenue, Eltham**

---

b) Fencing

All tree protection fencing required by this permit must be erected in accordance with the approved TPZ.

The TPF must be erected to form a visual and physical barrier and must be a minimum height of 1.5 metres and of chain mesh or similar fence.

c) Signage

Fixed signs are to be provided on all visible sides of the TPF clearly stating "Tree Protection Zone – No Entry", to the satisfaction of the Responsible Authority.

d) Provision of Services

Unless with the prior written consent of the Responsible Authority, all services (including water, electricity, gas and telephone) must be installed underground, and located outside of any TPZ, to the satisfaction of the Responsible Authority.

e) Access to TPZ

Should temporary access be necessary within the Tree Protection Zone during the period of construction, the Responsible Authority must be informed prior to relocating the fence (as it may be necessary to undertake additional root protection measures such as bridging over with timber).

8. Prior to the commencement of the approved works (including any demolition, excavations, tree removal, delivery of building/construction materials and/or temporary buildings), the erected tree protection fences must be inspected and approved by the Responsible Authority. Once erected to the required standard, the tree protection fencing shall be maintained in good condition and may only be removed upon completion of all development works, to the satisfaction of the Responsible Authority.
9. The following actions must not be undertaken in any tree protection zone as identified in this permit, to the satisfaction of the Responsible Authority:
- a) Materials or equipment stored within the zone;
  - b) Servicing and refuelling of equipment and vehicles;
  - c) Storage of fuel, oil dumps or chemicals;
  - d) Attachment of any device to any tree (including temporary service wires, nails, screws or any other fixing device);
  - e) Open cut trenching or excavation works (whether or not for laying of services);
  - f) Changes to the soil grade level;
  - g) Temporary buildings and works; and
  - h) Unauthorised entry by any person, vehicle or machinery.

**Planning and Consultation Committee Minutes**

**9 August 2022**

**6. Planning Matters**

**PCC.028/22 Construction of a second dwelling (double storey) to the rear of the existing dwelling at 2 Kirwin Avenue, Eltham**

---

10. The materials to be used in the construction of the buildings and works hereby permitted shall be of non-reflective type and finished in muted tones, to the satisfaction of the Responsible Authority.
11. Air-conditioning and other plant and equipment installed on the subject buildings shall be so positioned and baffled so that noise disturbance is minimised, to the satisfaction of the Responsible Authority.
12. Stormwater must not be discharged from the subject land other than by means of an underground pipe drain to the nominated point of stormwater discharge.
13. No polluted stormwater, effluent and/or sediment laden runoff from the development site is to be discharged directly or indirectly into Council's drains, Melbourne Water's drains or watercourses or adjoining private property during any stage of the construction. Sediment fencing and/or pollution/litter traps must be installed on site and serviced accordingly to the satisfaction of the Responsible Authority.
14. The vehicular driveway must be properly formed and constructed meeting the ramp grades specified in the Nillumbik Planning Scheme and to such levels to ensure that it can be utilised at all times. Appropriate transitions with a maximum change in grade of 1 in 8 should be provided to enable access by all types of vehicles. The driveway must be drained, constructed in concrete, asphalt or similar surface and maintained in a continuously useable condition. All works are to be carried out to the satisfaction of the Responsible Authority.

Stormwater from the driveway must be collected using 225mm wide trench-grates across the driveway at property boundary where it meets road reserve and connected to the on-site detention device/legal point of stormwater discharge.

A minimum pipe diameter of 225mm must be used for all underground drains, within the internal drainage system underneath the driveway.

15. Stormwater from the roof of existing and new dwelling must be directed, via the internal drainage system, to an underground detention storage system with must be directed to the on-site detention system. The overflow from the on-site detention system must be directed to the nominated point of discharge.

Each dwelling must be provided with an independent underground drainage discharge system. Both systems are to be connected to the nominated point of stormwater discharge.

The detention storage shall be provided underground and the stormwater drainage system from the existing dwelling must be located outside of the footprint of the proposed dwelling.

Water in the holding tanks may be used for one or more of the following purposes: toilet flushing; property irrigation; vehicle washing and any other purpose approved by the Responsible Authority.

16. The on-site detention device must be designed by a qualified engineer and plans submitted must be to the Responsible Authority for approval, prior to the commencement of the development (except with the prior written consent of the Responsible Authority).

Planning and Consultation Committee Minutes

9 August 2022

6. Planning Matters

**PCC.028/22 Construction of a second dwelling (double storey) to the rear of the existing dwelling at 2 Kirwin Avenue, Eltham**

---

The engineer that is designing the on-site detention device must obtain tc and tso figures from Council. The permissible site discharge must be restricted to a pre development flow rate for a 20% Average Exceedance Probability (AEP) and detained for a 10% (AEP) event.

17. An on-site detention device must be constructed, at no cost to Council, in accordance with the endorsed plans and connected to the Council nominated point of stormwater discharge.
18. Construction of the on-site detention device must be carried out under Council supervision, in accordance with the approved plans and specifications and under an *Infrastructure Works Permit*.
19. This permit will expire if one of the following circumstances applies:
  - a) The development is not commenced within 2 years of the date of this permit.
  - b) The development is not completed within 4 years of the date of this permit.

The Responsible Authority may extend the periods referred to if a request is made in writing before the permit expires, or within 6 months afterwards if the development has not commenced, or 12 months after if the development has commenced but is not yet completed.

<b>Motion</b>
---------------

**MOVED: Cr Frances Eyre**  
**SECONDED: Cr Natalie Duffy**

**That** the Committee (acting under delegation from Council) issue a Notice of Decision to Refuse to Grant a permit to the land located at 2 Kirwin Avenue, Eltham for the '*Construction of a second dwelling (double storey) to the rear of the existing dwelling*' at 2 Kirwin Avenue, Eltham on the following grounds:

1. The proposal is inconsistent with the objectives of Clause 16.01-1L (Location of medium density residential development) of the Nillumbik Planning Scheme due to the site's distance from the Eltham Major Activity Centre.
2. The proposal is inconsistent with the objectives of Clause 15.01-5L (Neighbourhood Character – Nillumbik) of the Nillumbik Planning Scheme due to:
  - a) Building bulk, massing and scale.
  - b) Insufficient landscaping opportunities.
3. The proposal does not meet the following objectives of Clause 55 of the Nillumbik Planning Scheme:
  - Clause 55.02-1 Neighbourhood character
  - Clause 55.03-8 Landscaping
  - Clause 55.06-1 Design detail
4. The proposal is an overdevelopment of the site.

## Eltham Gateway Project survey

Jul 13, 2022 - Aug 07, 2022

**Project:** Eltham Gateway Project

**Tool Type:** Form

**Activity ID:** 387

**Exported:** Aug 08, 2022, 12:39 PM

**Exported By:** [REDACTED]

Response No:  
1

Contribution ID: 21039

Member ID:

Date Submitted: Aug 07, 2022, 10:09 PM

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

I like the inclusion of native plants and edibles, and the acknowledgement of the traditional owners of the land and indigenous culture in general, but I worry that the overall design is too cultivated/landscaped, and will look too man-made.

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

Indigenous / edible garden  
The structured indigenous planting  
Seating  
Meeting circle  
Spiral Path

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A looped path similar to that presented, that also has an entry point to the north out to Main Road

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted / spread throughout the site, rather than in one specific area

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Yes

**Q8** Please provide any additional comments

Long Text

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Unsure

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	Most of these sound alright, but I don't know what you mean by tee-pees. If this is some form of appropriating North American (Turtle Island) First Nations designs, that would be a hard no. Some wooden play equipment sounds like fun, but I would prefer the overall focus of the area be on vegetation and nativa flora/fauna.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	The map image provided is too low-resolution to make out any of the labels, so I can't comment, but as with the rest of this, please focus more on revegetation with native plants, and less on making it a landscaped area.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	Same as for Area B.
<b>Q18</b>	<b>First Name</b>
Short Text	████
<b>Q19</b>	<b>Last Name</b>

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

I don't like much of it at all. It does not reflect the majority view of the respondents to Vicky Wards survey. The plan is too artificial formal and contrived.

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

Other (please specify): No looped path. Area A should be a natural revegetated area with indigenous plants to provide the continuous wildlife corridor along the creek. Canopy trees need to be replaced in this area.

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

No

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

No

**Q8** Please provide any additional comments

Long Text

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

**Q13** Provide any additional comments

Long Text

The recycled timber should be used but not for the above items and certainly not in Area A.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Unsure
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Seats
Q16	Any comments on Area B
Long Text	Revegetation of indigenous plants is of paramount importance. Again the plan is too contrived and doesn't allow for natural habitat
Q17	Any comments on Area C
Long Text	As above

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

I like the fact that the idea of an Eltham Gateway is being addressed and discussed.

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

**Q8** Please provide any additional comments

Long Text

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

**Q13** Provide any additional comments

Long Text

I believe the design is trying too hard to please everyone especially close to a busy main road.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	
Q15	What is your preference for the re-use of these stumps?
Multi Choice	
Q16	Any comments on Area B
Long Text	Why isn't the florist tent apart of the design? Money is going to be spent on the Gateway to Eltham but you will have an old tent as the focus . it doesn't make sense.
Q17	Any comments on Area C
Long Text	Unfortunately there is no wow factor with the conceptual drawings and the area will look very similar to what is already there. The money needs to be spent on the bridge going over the Diamond Creek. This bridge should be the focal point to Eltham's Gateway.

- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box
- Unsure
- Q13** Provide any additional comments
- Long Text
- I am generally supportive of this but not of the construction of tipi structures specifically. This is culturally appropriative of First Nations Americans cultures and is not in spirit with the respect due to Indigenous peoples.

<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Carvings

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

**Q13** Provide any additional comments

Long Text

My understanding was that this 'new gateway' was to be a way to revegetate the area on both sides of Main Road with canopy trees to try and replace the homecoming feel that we had lost and to enhance the wildlife corridor along the creek. Something simple and natural! It takes a lot of skill to design a 'garden/landscape' that looks as if it has always been there. Gordon Ford could. The design we are commenting on is too artificial, too 'organised.'. We just want trees, bushes, ground cover to walk through. Like the nature walk along the creek in Eltham Lower Park. Nothing more complicated. I am

confused by 'indigenous'. If you mean that the plants used will all be indigenous to the area, then, Yes. If you mean an artificial garden of indigenous plants, maybe edible, that were used by aboriginal people then, No. Reusing the felled timber is good but not sure about play equipment in that area. If the area is purely trees and plants with meandering paths then I don't see the need for a fence which would only cause more maintenance costs re whippersnipping.

<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Unsure
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	As much planting of indigenous canopy trees and shrubs as possible. Low maintenance. A natural treed entry to Nillumbik.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	As much planting of indigenous canopy trees and shrubs as possible. Low maintenance. A natural gateway to Eltham/Nillumbik.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text That it appears to be making some commitment to retaining a bushy welcome to the gateway to the green wedge shire
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- The structured indigenous planting  
Indigenous / edible garden  
Mix of steel/timber fence  
Looped pathway  
Spiral Path  
Seating  
Meeting circle  
Log steppers/balance logs
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text I think the area should largely be planted out there are plenty of other places for people to gather. Whenever there are gathering places the plants are subject to trampling and inevitably there is rubbish left behind.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- No
- Q11** Please provide any additional comments
- Long Text I think all materials should be sourced as locally as possible.
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box
- No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	I don't think this should be a play area, I think it should be a bushy space with ground covers, mid story and tall plantings, encouraging birds and insects not people.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Carvings
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	I think it should include more indigenous planting of all levels.
<b>Q17</b>	<b>Any comments on Area C</b>

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text  
Respects the Indigenous custodial ownership and vegetation, level of awareness of environment and art as strong features of the Eltham community.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking  
Looped pathway  
Meeting circle  
Spiral Path  
Seating  
Indigenous / edible garden  
The structured indigenous planting  
Log steppers/balance logs  
Mix of steel/timber fence
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box  
A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box  
Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box  
Planted around the wider path and meeting circle
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box  
Yes
- Q8** Please provide any additional comments
- Long Text  
I think it is important to also have a northerly access path to the meeting circle so people walking in both directions have a ready access path to the meeting circle and spiral. Otherwise I suspect people walking from the north will tread a path through the vegetation regardless, rather than walk the extra distance via the existing proposed pathway.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box  
Unsure
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box  
Unsure
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box  
Unsure

- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box Yes

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	I think it would be great to include the dead trees in some form in the design. It supports recycling and most importantly respect for the local environment
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Carvings
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	It doesn't matter what the trees are used for but so important to include them in the design and construction. There is a Carver in Eltham on the main road. Has some nice carvings.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	Aboriginal art here please Near the entrance with the Acknowledgement to land. Would be great to have the Local Aboriginee commissioned to create a piece for the entrance

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

I don't like the plan. The current gateway represents Eltham perfectly. There are enough kids parks and manicured gardens existing already.

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

Indigenous / edible garden

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A linear path from north to south (rather than a loop)

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted / spread throughout the site, rather than in one specific area

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

No

**Q8** Please provide any additional comments

Long Text

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

**Q13** Provide any additional comments

Long Text

There are an abundance of children's playgrounds existing. Do not cut down existing trees to make play items.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text I like that something is being done
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Unsure
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text It is important that as close as possible to the ground and natural vegetation be restored to preserve a sense of the area.
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text Would rather the vegetation was the primary element here.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box Unsure
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box No
- Q11** Please provide any additional comments
- Long Text Pine trees (*Pinus radiata*) do not produce timber suitable for fencing unless it is deeply penetrated by pressure treatment with preservatives. Some of the trees I recall are Cypress, but this is also not particularly durable and is also difficult to treat. This would be expensive and inappropriate use of funds unless the work is donated. If this goes ahead it may be that the Timber Preservers Association of Australia and Forest and Wood Products Australia Limited (FWPA - the industry funded promotion body) might find the cash as a way to promote timber. Even above ground, the untreated pine timbers will not last a decade and will create a safety hazard as they fragment and rot.
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No

Q13	Provide any additional comments
Long Text	See above comments. The timber will not be not fit for this purpose.
Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Unsure
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	Area B should have some significant multi-layered revegetation and tree choice should reflect the flood plain.
Q17	Any comments on Area C
Long Text	Area C is of major visual interest. It should have plantings to restore the presence of large eucalypts over the coming decades. It also has scope for visibly flowering understorey vegetation.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text The indigenous planting on either side of the road, over time this will contribute to a sense of immersion within the vegetation - which is so important to the place of Eltham
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking The structured indigenous planting
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): Whilst I appreciate the intent of the garden and looped path I strongly believe this is the wrong location, the focus should be on revegetation of this zone to help bring back a sense of immersion and place through planting - not the addition of further hard landscaping elements, sculptures and fences which add to a sense of urbanisation. For pedestrians, cyclists and road users this is essentially a transitory area, to increase the planting would really add to this experience. This kind of space would be a great addition to Lower park where people spend time, there are a number of areas adjacent to other activity spaces that are in need of landscaping.
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text This could be a valuable resource for the community, but it is in the wrong location, it is too close to the road to be peaceful and encroaches further into the vegetation band of the creek. Perhaps more adjacent to the park at Hohnes Rd Playhouse, within
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text The same comments as above, even more so this feels like a really marginal area to locate a meeting circle which surely deserves a more serene and generous location away from the road
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	As above I believe that the further addition of hard landscaping such as fences, play items, sculptures etc is in the wrong location. It will take away from the opportunity to create more depth to the vegetation around the creek and would be far better suited to the hohnes park area
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	No
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	This seems like a good proposal and will improve the area around the florist - a local landmark :)
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	This area also seems fine, however if there is to be a future sculpture I would argue that it needs to be a high quality commission and sympathetic to the surrounds. Eltham and Nillumbik has a proud and rich artistic culture and yet rarely does this translate well to the public art around the shire, particularly Eltham.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text I like the emphasis on a treed landscape with low impact features interspersed along a path through the large Area A. The treatment of the other areas is sympathetic with a sculpture as a defining feature.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Seating  
Meeting circle  
Indigenous / edible garden
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Unsure
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text A sign showing the plants in the area would be good
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Yes
- Q8** Please provide any additional comments
- Long Text I think the "creek side" path is good but the loop back near the shared path beside Main Road is not needed. Instead, there should be a connection back to the shared path near the northern end.  
I also think the spiral pathway is too busy and should be deleted.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box Yes

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	I think we should have both seats and a carving (see below).
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	I think the area could be better "enclosed" with tree planting along the western border including at the back of the Flower Seller area. Does the business require access from the back when they have access to a circular driveway in the front?
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	I think the plans for a sculpture in this area are excellent; it may also be possible to have a reference to the sculpture on the other side of the road. The sculpture should only be lit by unobtrusive lighting if at all.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text The use of "White Trunk Trees" defining the verges of "The Gateway". The removal of and replacement if non indigenous vegetation.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking The structured indigenous planting  
Looped pathway  
Seating
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A looped path as presented
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text Expensive to maintain and doesn't add to a new visual "Gateway"
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text I would prefer a less structured area that has wooden seating (with backs) for resting and enjoying the natural environment.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No
- Q13** Provide any additional comments
- Long Text I don't believe a structured play space is suitable for this area.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	I think the use of rocks is unwise and would prefer the planting of shrubs, plants and grasses.
Q17	Any comments on Area C
Long Text	I really like the use of "White Trunk Trees" as part of "The Gateway" and the inclusion of a "Major Piece of Art"

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text I want less paths, steps and sculptures and MORE TREES!!!
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- The structured indigenous planting  
Indigenous / edible garden  
Looped pathway  
Log steppers/balance logs  
Meeting circle  
Spiral Path  
Mix of steel/timber fence  
Seating
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Unsure
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text I just want as much planting as possible to help drown out the noise of what is now a highway at my door
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text No one is going to sit and meet along a main busy road... just plant more trees to muffle the sound of the cars and give us back our green gate which is why we live here.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- Unsure
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

- Select Box
- Yes

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	In keeping with a natural surrounding
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	I'm not sure why that area has to be kept for the florist. While that use to be the ugliest section of the gateway, it is so sad that now that is actually the first bit of greenery that we see.... So devastatingly sad. So why not green up that car park area and plant a lot more trees and create a garden ... a real green gateway.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	You guessed it..... more TREES!

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text Creation of a well treed gateway, both sides of the road. Suggestion of white trunk gums sounds attractive.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Looped pathway
  - Seating
  - Mix of steel/timber fence
  - The structured indigenous planting
  - Spiral Path
  - Log steppers/balance logs
  - Meeting circle
  - Indigenous / edible garden
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Unsure
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text Would need to be drought resistant
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text The area is relatively small so a meeting circle would mean more gravel area rather than keeping things green.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box Yes
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box Unsure

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	I would like the fence to be minimal & as natural as possible, just to keep cyclists & pedestrians on the outer path.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	I would like to see an avenue of trees along the side of the road. Gums with white trunks featured, with gums behind having darker trunks - this was a suggestion at the pop - up information session & sounds attractive.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	As for area B, would be good to have a leafy green gateway to Eltham after that bare intersection. I applaud the idea of the Eltham Gateway project & appreciated the opportunity to speak with people at the pop - up session in front of Eltham Lower Park on the Sunday morning - it was very helpful.

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

Seating

Indigenous / edible garden

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A linear path from north to south (rather than a loop)

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted / spread throughout the site, rather than in one specific area

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

No

**Q8** Please provide any additional comments

Long Text

We would prefer the indigenous plants to be dispersed in a natural fashion as they would be in nature. The spiral concept would be our least preferred planting.

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

No

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

**Q13** Provide any additional comments

Long Text

We really don't see this area as a type of playground. There's the whole of Eltham South Parklands for recreational play.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Seats
Q16	Any comments on Area B

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

Other (please specify): I support the design that will allow for the highest concentration of trees, to recreate the original feel of the treed roundabout signalling the gateway to Eltham. If a path is included, suggest it have entrances on both sides

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Unsure

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Unsure

**Q8** Please provide any additional comments

Long Text

It would be OK to have a meeting circle further inside the park in areas that did not originally have trees, but it should not impact the view from main road which I would prefer to focus on recovering lost trees

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Unsure

**Q13** Provide any additional comments

Long Text

It would be OK to have a play area in areas that did not originally have trees, but it should not impact the view from main road which I would prefer to focus on recovering lost trees

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	
Q15	What is your preference for the re-use of these stumps?
Multi Choice	
Q16	Any comments on Area B
Long Text	Please plant trees to replace those taken during the construction project
Q17	Any comments on Area C
Long Text	Please plant trees to replace this taken during the construction project. I'd rather retain the gum forest feel of entering Eltham rather than including a feature sculpture. If the latter goes ahead I would appreciate consultation of the actual sculpture to be erected.

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

The planting proposed. The proposed use as a place to sit and dwell is inappropriate due to traffic noise.

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A linear path from north to south (rather than a loop)

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

No

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

**Q6** Please provide any additional comments

Short Text

An indigenous garden is a lovely idea but not in this location. Anything in this location will be drowned out by traffic noise. Fabio's paddock or another quieter more tranquil location is better suited for a garden.

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

No

**Q8** Please provide any additional comments

Long Text

I pass this location daily on my way to the river and it is very noisy and definitely not conducive to sitting and spending time at. There are far better locations for this kind of activity. This should simply be planted with native vegetation.

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

Unsure

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

Yes

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

**Q13** Provide any additional comments

Long Text

Reuse of materials is an excellent idea, but these activities are already supported in nicer locations. There is an excellent playground nearby and also a sitting area overlooking the river as well as wetlands with a range of seating. Having grown up exploring this section of the Diamond Creek this is not a nice place to dwell and in my opinion won't be utilised in this way.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Seats
Q16	Any comments on Area B
Long Text	The proposed wood carvings are rather small and suited to pedestrians which this area is not conducive to. Pedestrians are more prominent on the other side of the Main Rd as they walk, run and ride to the river. Efforts should be put into a substantial large sculpture rather than a scattering of smaller ones.
Q17	Any comments on Area C
Long Text	It's unclear from this plan where this is located.

I appreciate the concept, however it would be better situated closer to a waterway than main rd. It would be unlikely that people would choose to meet there and gather, but rather move through this space to access the park.

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text The natural feeling of it.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Looped pathway
  - Seating
  - Log steppers/balance logs
  - Spiral Path
  - The structured indigenous planting
  - Mix of steel/timber fence
  - Indigenous / edible garden
  - Meeting circle
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Unsure
- Q8** Please provide any additional comments
- Long Text
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box Yes
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box Yes

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Carvings

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text
- An opportunity to green the entrance into the Eltham Gateway to try to offset some of the environmental impact of the extensive infrastructure works involving removing the treed areas and roundabout close by.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Looped pathway  
Seating
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box
- Other (please specify): A looped all access (width/surface treatment) pathway connecting at the eastern and western ends with the Diamond Creek Trail
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box
- No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text
- If this is required I would suggest it is placed in Area B
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box
- Unsure
- Q8** Please provide any additional comments
- Long Text
- I consider Area A should primarily be a passive creek side environs. If a meeting circle is to be provided I feel this should be a very informal space that includes a couple of seats with backs and arms to provide support for all users. Appropriate room adjacent to these seats should enable access for people using wheelchairs or other mobility equipment.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box
- No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	I consider Area A should not include the detailed spiral design depicted in the concept plan and should predominately be a low key informal area to encourage and allow passive relaxation. I don't support provision of features to support active play in Area A as there are already two established playgrounds close by in Eltham Lower Park as well as extensive open space areas there for a range of other activities. Area A should retained as a bushy environment continuing the greened wildlife corridor along the Diamond Creek.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	No
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	If there needs to be any active elements or a structured meeting space and indigenous/ edible gardens within this precinct these could be on a smaller scale within Area B. I consider the small section of land on the corner of Main Road and Falkiner Street could have dense multilevel indigenous planting to help screen the open gravel surfaced area used part time by the florist. Additional planting could be introduced into this leased area, with agreement of the tenant/florist, which I would imagine would also improve the immediate appearance of their operations.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	Area C may be the appropriate area for a sculpture and/or a structured meeting space and indigenous/ edible gardens, with pathway access.  I encourage Council to have a detailed access evaluation undertaken of this total project, by an independent accredited access consultant, to ensure access opportunities are maximised for all users, including people with disabilities.

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text The removal of weeds and non native vegetation; the retention (and hopefully the enhancement) of the green space

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box Planted / spread throughout the site, rather than in one specific area

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box No

**Q8** Please provide any additional comments

Long Text

I would prefer to maximise the green space and vegetation as much as possible to promote bird and insect life I would prefer Area A to only have the looped walking track with seating /rest areas and not lose space to features such as the spiral path and meeting circle. At the exit /entrance points to the looped path I would like to see bins and access to water provided for human and dogs.  
Also I'm concerned the removal of dead trees may remove or severely reduce nesting /breeding opportunities for birds/ mammals provided by the hollows in the trees. In the event that none of the dead trees can be retained for this purpose (of breeding sites) I would like assurances that suitable and sufficient nesting /breeding boxes will be provided so there is not a detrimental impact on our wildlife.

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

Yes

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

Yes

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Yes

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	I support the re-use of timber from the removed pine trees, to be recycled as a combination of log steppers, balance beams, tee pees and sculptured play items if these are incorporated along /into the looped pathway with minimal loss of ground / vegetation / trees/ habitat.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	I'm concerned any removal of dead trees may remove or severely reduce nesting /breeding opportunities for birds/ mammals provided by the hollows in the trees. In the event that none of the dead trees can be retained for this purpose (of breeding sites) I would like assurances that suitable and sufficient nesting /breeding boxes will be provided so there is not a detrimental impact on our wildlife.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	I'm concerned any removal of dead trees may remove or severely reduce nesting /breeding opportunities for birds/ mammals provided by the hollows in the trees. **Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A looped path similar to that presented, that also has an entry point to the north out to Main Road

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Unsure

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted around the wider path and meeting circle

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Yes

**Q8** Please provide any additional comments

Long Text

With a speakers dias please. And banked seating like at the bottom of the Warrandyte Bridge

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

Yes

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

Yes

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Yes

**Q13** Provide any additional comments

Long Text

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	
Q17	Any comments on Area C
Long Text	The art sculpture should be one that that says welcome to people and is the Eltham style.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text Please leave the trees and plant more. This is the only real contribution to a healthy environment for us , Me bourne and future generations. Don't include playground, paths, monuments. Threes are the monuments and places to play as aboriginal di
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): None of the above, only native vegetation to have a bush like entrance to the shire
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text Only plant native vegetation to have a bush like entrance
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text Please only plant native vegetation particularly trees to grow a canopy entrance and a bush like environment which no human intervention. That would be very appreciated to future generations and provide relax and oxygen, a place to play and learn. No building, seats, paths, monuments. Leave it as virgen as poss ble. Have a huge canopy. This is what we love when entering Eltham. The trees.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	The great contribution we can do to our inhabitants and Melbourne in general is to plant trees, include native vegetation. This area is Me bourne lungs. We have lent of playgrounds. We don't need more of those but to recover trees that are being lost.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	No
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	Do not remove trees. Relocate them or plant new. Do not include any fence in any area A, B or C. Please plant trees to have a huge canopy for future generations . Start now.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	Plant trees and native vegetation and leave it as much as possible to appear a bush which is the original landscape of the area. This will be really a contribution and the real acknowledgment for Wurundjery people who would not be cutting trees to include a playground or a path.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?  
Short Text nothing. why is it necessary to urbanise this bushland?
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference  
Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option  
Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?  
Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)  
Select Box
- Q6** Please provide any additional comments  
Short Text please don't do this. native trees, native bush, a path through it. what could be better? certainly not this proposal.
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?  
Select Box No
- Q8** Please provide any additional comments  
Long Text There are enough humanized, urban parks already. This urban development is not needed. I can't rationalise "improved" with this proposal.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?  
Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text Only the tree replacement plans.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): Just a simple pathway leading to a simple seating area.
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text This was NOT part of the community's feedback.
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Unsure
- Q8** Please provide any additional comments
- Long Text An area of seating is welcome, with benches separated at least 1.5m apart. This should be accessed by just a simple pathway in a grassy area with views of new treed and grassed areas only.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box No
- Q11** Please provide any additional comments
- Long Text A low cost and low maintenance project is required. Fences are unnecessary and would be difficult for mowers to access properly.
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No
- Q13** Provide any additional comments
- Long Text Reuse the timbers elsewhere, perhaps for a carved feature/figure. Play items, log steppers and balance beams were NOT proposed or suggested in Vicky Ward MP's survey responses. We just want grassy and indigenous treed areas. Almost 80% of the 370 respondents indicated their preference for a natural re-vegetated area.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	This area should also be re-vegetated with indigenous plants of canopy trees and bushes.
Q17	Any comments on Area C
Long Text	This is the most appropriate area to include some artwork with a theme influenced by Aboriginal history/culture, also potentially using the wood from the lopped cypress pines, and more seating.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Seats
Q16	Any comments on Area B
Long Text	Why does the flowers space trump all other considerations? If like to see some of that ugly, unkempt and barren space returned to greenery. When the flower sellers permit is up surely the space the use can be reduced. They don't need that entire wedge. I don't want to kick them out, but they seem to be given undue weight in terms of what they want ( I.e. more ugly space than they need).

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text indigenous edibles

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

Indigenous / edible garden  
Meeting circle  
Spiral Path  
Looped pathway  
Seating  
The structured indigenous planting  
Log steppers/balance logs  
Mix of steel/timber fence

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box A looped path as presented

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box Planted / spread throughout the site, rather than in one specific area

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box Yes

**Q8** Please provide any additional comments

Long Text

This is supposed to be a welcoming gateway. The steel/timber fences will make "a block", so not be welcoming. I guess you want the fences due to the play areas. But why have play areas here? There are two play areas in Eltham Lower park already. This is close to a main road, not an ideal meeting and play site. Do we really need or want a meeting area next to noisy cars? I feel this proposal is too ambitious, trying to do everything: meeting, playing, planting, edibles, spirals, log carvings! That's a lot and perhaps stepping away from the idea of being a glorious welcome home to the tree-ed suburb of eltham. And I say no to the art work!

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

Q12	Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
Select Box	Yes
Q13	Provide any additional comments
Long Text	but why have a play area so close to two other play areas in Eltham Lower park and why have it so close to a main thoroughfare.
Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	have you considered fire resistant species for the future
Q17	Any comments on Area C
Long Text	not keen on artwork at the entrance. It is supposed to be natural, native, eucalypts etc, according to your findings from your previous survey.

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Yes

**Q13** Provide any additional comments

Long Text

This would be a great way to include the history of the site and use the existing trees and create sculptures from them and double as play spaces for kids and adults alike which is so needed at this time, so important to have more interactive outdoor spaces in nillumbik and educate us on indigenous bush tucker foods.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	i would like to see more white trunk native trees , more avenue trees and indigenous plants along here.
Q17	Any comments on Area C
Long Text	i would like to see a sculpture using large basalt rock / timber and steel. more Eltham like.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text It is really interactive with interesting areas
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Looped pathway
  - Spiral Path
  - Indigenous / edible garden
  - Seating
  - Meeting circle
  - Log steppers/balance logs
  - The structured indigenous planting
  - Mix of steel/timber fence
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Yes
- Q8** Please provide any additional comments
- Long Text A great place for people to congregate for catch ups
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box Yes
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box Yes

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	I love that the timber is being reused
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	It would be great to have seating, gardens and maybe mobile food trucks to compliment the florist
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	native gardens to compliment the sculpture

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

The structured indigenous planting  
Looped pathway  
Indigenous / edible garden  
Spiral Path  
Mix of steel/timber fence  
Seating  
Meeting circle  
Log steppers/balance logs

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A looped path similar to that presented, that also has an entry point to the north out to Main Road

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted around the wider path and meeting circle

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Unsure

**Q8** Please provide any additional comments

Long Text

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

Unsure

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

Yes

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Unsure

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text That some replacement of lost trees & shrubs will be made
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): We would prefer that the area is cleared of weeds, old trees and logs etc left as they sit for wildlife habitat
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text This should be located behind the flower seller area and Area A left as a wildlife refuge/sanctuary
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Yes
- Q8** Please provide any additional comments
- Long Text The meeting circle is a fine idea but it should be located away from Area A at Site B Please leave Area A as a natural area and not pretty it up for human use. There is plenty of area on the other side - B that can be used for these valid ideas.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box Unsure
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No
- Q13** Provide any additional comments
- Long Text As above - none of this "Development" is appropriate for Site A it should be part of Area B

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	Area B has plenty of area to incorporate area A's design into it and leave Area A for a natural corridor. Human intervention in Nature is not necessary please leave some area for the birds and animals. People will complain of snakes near the river - it is their & the lizards & frogs home and needs to be revitalised but in a sensitive environmental manner and kept as wild indigenous not structured
Q17	Any comments on Area C
Long Text	This are could have low growing grasses that attract insect and birds beneath the Art sculpture

Long Text

Area A.  
With our State of the Environment in mind, Please remove all the weeds (Pines are weeds)  
Cover the area with Indigenous Plants — those species which would have been there before Settlement.  
Continue removing weeds and caring for the plants. ( There will be a seed bank, with some weed seeds being viable for several years).  
This will link the Diamond Creek Wildlife Corridor with the Hones Hill Corridor — with the little creek connecting the 2.

A pathway, seating and some information will help people to appreciate our Natural Environment.

Thank you.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text More trees, less hard surfaces
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): Trees and dense bush, there is plenty of open space in the park
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text The garden won't be maintained and just become weed infested, or dry out and become a dust bowl
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text Because it would attract foot traffic, should be dense bush and trees
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text The planting of indigenous plants and restoring of a green canopy of trees to replace the unnecessary removal of trees for the Fitzsimons Lane Main Road development
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking The structured indigenous planting  
Seating
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text I do not feel this is the most suitable area for an indigenous garden. The concept is a great idea but not in this location.
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text I am unsure as to why council feels the need to overdevelop this area. Most people who live in Eltham come here for the green spaces and natural Bush look. This is gradually being eroded and overdeveloped. The gateway to Eltham should remain as natural as possible. Development doesn't have to mean destruction. Also with the poor record Australia now holds for endangered animals it is a stark reminder to not overdevelop and appreciate what makes Eltham so unique and native animal friendly.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	As above
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	Again I am unsure why this area cannot be used for just planting a very natural bush landscape - something we all want as the gateway to Eltham.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	Indigenous artwork is a good idea here together with signage honouring our indigenous heritage

Select Box

**Q13** Provide any additional comments

Long Text

Main concern is provision of clear signage for cyclists and walkers through from Westerfolds Park onto miniature railway on to and through the creek parkland which in my experience were a maze for the visitor who wanted to reach Eltham central area. No signs or inconsistent style of signs was a problem  
The new trail will draw people from all over east and provide visitors all along

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text I and my family have lived in Antoinette Boukevard for over 50 years and worked tirelessly to protect the wildlife and flora and unique character of this area. I most certainly object strongly to area A being used for congregating. It must be kept bushy
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box
- Q8** Please provide any additional comments
- Long Text
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box
- Q13** Provide any additional comments
- Long Text This survey is restrictive and manipulative with no option to disagree. Especially area A should NOT be used by people. It is imperative that the banks of the creek and adjoining areas be kept undisturbed for the preservation of wildlife and nesting birds. MUST be bushy and not disturbed by people walking or congregating This end of Duamond creek and the banks and land adjoining the creek are the last refuge for our eunique

wildlife - which are already struggling to survive. I am a resident who has lived in this area for over 59 years.-and strongly object

**Q14** Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text The removal of non native trees/vegetation. The opportunity for passers-by to stop and get a snapshot of what Nillumbik means and feels like.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- The structured indigenous planting  
Looped pathway  
Spiral Path  
Meeting circle  
Indigenous / edible garden  
Seating  
Mix of steel/timber fence  
Log steppers/balance logs
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted around the wider path and meeting circle
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Yes

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

Other (please specify): Area A doesn't need any paths or other built form landscaping. Simply just remove all non native/indigenous plants/trees and plant with indigenous planting. Save the money please.

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

No

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

**Q6** Please provide any additional comments

Short Text

Nothing formal in this area of the plan please. As per above comment. Save the money. Not needed. Eltham gateway should just be about feeling like you're coming home to the bush.

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

No

**Q8** Please provide any additional comments

Long Text

As per both above comment.

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

**Q13** Provide any additional comments

Long Text

As per above comments nothing formal is needed.

If council is set in wasting money on an area that is unlikely to be used (given the two other playgrounds already there) then yes, fine. Use the wood from the cut down pines.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	Please no grass on area B. Prefer Just full plant out with indigenous planting please. If it's absolutely insisted to be grass - please make all native grass which can be mowed. No non native grass. The whole feeling of Eltham is about coming come to bush. That's why we are different to the rest of suburbia.
Q17	Any comments on Area C
Long Text	Art sculpture to be large and some sort of rusted metal. An additional wooden piece by Leigh would also be nice.

- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Yes
- Q8** Please provide any additional comments
- Long Text
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box Yes
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box Yes
- Q13** Provide any additional comments
- Long Text

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text Nothing - the questions are contrived to illicit specific responses
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): Leave area A alone - the only thing required is to control the weeds. No need to pretend to replace trees cut down at the roundabout by cutting more down to put in a contrived path. Why do we constantly have to destroy the natural bush?
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text Per my comments above. Area A is completely wrong focus. If anything, attention should be directed to Areas B and C on the north western side of Main Road on the outer radius where one's eyes are naturally drawn to either arriving or leaving
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text As above - leave it alone
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No
- Q13** Provide any additional comments
- Long Text Leave Area A alone

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	No
Q15	What is your preference for the re-use of these stumps?
Multi Choice	
Q16	Any comments on Area B
Long Text	Why does everything this Council plans have to have an Indigenous stamp on it - Cr Duffy at large here clearly. This area was not an important Indigenous gathering/ meeting area - that focus should be directed more at the confluence of the Diamond Creek and Yarra River at Lenister Farm where the sculpture 'Not just a pretty place' is situated. Besides, Main Road is busy and noisy with car traffic which would make it unpleasant and clearly MRPV has design intentions to rip the heart out of the gateway with a 4 lane divided road right up through the Avenue of Honour. Why else would they build a ridiculous 11 lane wide intersection that funnels directly into a 2 lane road in one direction and 4 lanes the other. Anything done in Areas B and C will be temporary.
Q17	Any comments on Area C
Long Text	As per Area B

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?  
Short Text Revegetation, landscaping
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference  
Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option  
Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?  
Select Box Unsure
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)  
Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments  
Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?  
Select Box Unsure
- Q8** Please provide any additional comments  
Long Text
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?  
Select Box Unsure
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?  
Select Box No
- Q11** Please provide any additional comments  
Long Text Do not include pine.
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?  
Select Box No
- Q13** Provide any additional comments  
Long Text Repurposed pine does not age well and looks cheap very quickly. Using it as mulch would be putting it to better use.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	No
Q15	What is your preference for the re-use of these stumps?
Multi Choice	
Q16	Any comments on Area B
Long Text	Area B "not" including trader should be presented for consideration. Alternatively include multiple traders or as a potential location for art installation.
Q17	Any comments on Area C
Long Text	If Area C is the favoured site for a major art installation, it should be a civil/civic collaboration, not the vision of an individual artist. A good example of such is 'Seeds Of Change' <a href="https://www.wyndham.vic.gov.au/venues/seeds-change-2004-designer-thompson-berrill-landscape-architects">https://www.wyndham.vic.gov.au/venues/seeds-change-2004-designer-thompson-berrill-landscape-architects</a>

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text Decent number of new native tree plantings
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- The structured indigenous planting
  - Mix of steel/timber fence
  - Log steppers/balance logs
  - Indigenous / edible garden
  - Seating
  - Meeting circle
  - Spiral Path
  - Looped pathway
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): I do not believe there should be a pathway, meeting circle or spiral pathway at all.
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box No
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text The pathways only result in reduced vegetation space and habitat for animals. I believe the pathways will detract from the vegetation space.
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text As above, this feature only serves to reduce space for vegetation from the area and turn it into more meaningless gravel.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Yes
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box
- Yes

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

Helps to ameliorate the tragic loss of our beautiful Eltham roundabout. We do need a new gateway. Need lots of additional planting to balance the loss of so many trees.

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

The structured indigenous planting  
Indigenous / edible garden  
Spiral Path  
Seating  
Meeting circle  
Mix of steel/timber fence  
Looped pathway  
Log steppers/balance logs

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

Other (please specify): a meandering path running north/south and connecting to the spiral path

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Other (please specify): Hard to know what would work best without knowing plants and maybe this is best decided on what works best

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Yes

**Q8** Please provide any additional comments

Long Text

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

Unsure

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

Yes

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	There is already a playground not too far away. This space could be more reflective, contemplative, quiet place. Prefer more emphasis on the garden and plantings.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Unsure
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Other (please specify): Please avoid kitschy carvings / sculptures. Seats might be okay, maybe.
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	Can't read the small print on this. Hope it includes some upgrading of indigenous Nillumbik planting in this area.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	Hope you get some good designs for the proposed art sculpture

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

It will help to soften the concrete monstrosity that has replaced the old roundabout

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A looped path similar to that presented, that also has an entry point to the north out to Main Road

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted / spread throughout the site, rather than in one specific area

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Unsure

**Q8** Please provide any additional comments

Long Text

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

Unsure

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

Yes

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

**Q13** Provide any additional comments

Long Text

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text Any removal of weeds and non native plants. The planting of new Australian native plants
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- The structured indigenous planting  
Indigenous / edible garden  
Looped pathway  
Seating  
Spiral Path  
Meeting circle  
Log steppers/balance logs  
Mix of steel/timber fence
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Yes
- Q8** Please provide any additional comments
- Long Text
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	The area should just include additional planting to compensate for the VAST number of trees removed for this project. This is vital for environmental reasons and renewal of habitat which has been sadly lost.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	As much large, medium and low level native planting as is possible in this area.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	Area C also requires far more planting.

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

**Q13** Provide any additional comments

Long Text

My last comments disappeared when I referred to the plans attached. Frustrating!!!  
The plan demonstrates what happens when a Landscape Consultant is given the opportunity to promote themselves with articles in Landscaping journals. They are trying too hard, and the plan is over-contrived in design. The plan needs to prioritise habitat, Indigenous planting including canopy trees, and acknowledgement of Wurundjeri. If Wurundjeri expressly WANT a chat room, then include it. Likewise, if Wurundjeri expressly want ed ble plant materials, include these with an information plaque. An under-maintained veg garden will be great for the initial centrefold, and embarrassing after that...

WORSE... it spoils the opportunity to heal the land by returning it to a pre-European typology. Better-informed briefing to the consultants is required in this instance. Nillumbik is not, surely, trying to produce a post-modernist landscaping (or similar), but endeavouring to create a bush-GATEWAY. Get landscapers out, unless the brief can be directed at being less contrived.

**Q14** Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?

Select Box

No

**Q15** What is your preference for the re-use of these stumps?

Multi Choice

**Q16** Any comments on Area B

Long Text

Consulting Area B Plan cost me my previous comments... so frustrating the process needs revision. Area B (as I am not able to consult the plan in mid survey) should contain. at least, a few more canopy trees, if the flower stall needs to be retained. Again, we are trying to design a GATEWAY, which demands a presence from Main and the tracks.

**Q17** Any comments on Area C

Long Text

Any sculpture needs a Wurundjeri theme... but I would like to respectfully explore with the Wurundjeri, if they would feel comfortable with a First-nations theme, in conjunction with a 'European' theme... a Culture Mix???

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text Area B and C
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Unsure
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text The general consensus from the community was that Area A should be a green and natural space that will revegetate the habitat along Diamond Creek. This proposed design has too many features and should be simplified so that this revegetation can take place
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text Area A needs to prioritise revegetation with a simple path and seating.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box Unsure
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box Unsure
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box Unsure
- Q13** Provide any additional comments
- Long Text Space needs to be given to proper revegetation; if the fence does not hinder this, then fine, but the space it takes up should be minimised.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Unsure
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Other (please specify): If they must be cut down, then they should be re-used - but the preference would be for large trees to remain as they are. We are losing too many large trees as it is.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text revegetation with indigenous flora
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- The structured indigenous planting  
Indigenous / edible garden  
Looped pathway  
Seating  
Mix of steel/timber fence  
Meeting circle  
Log steppers/balance logs  
Spiral Path
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text Given the amount of trees and vegetation removed for the recent road works, I think the focus of this area should be on revegetation, both from an aesthetic, 'welcome to Eltham' perspective and from an environmental perspective. A meeting circle is a great idea and could be placed on the grass area left on the other side of the road or in the extensive adjacent park areas, just not here.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box Unsure
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box Yes
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	See above comment - focus on revegetation - there is a huge park adjacent already.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Other (please specify): all good ideas
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	No, as long as there is plenty of vegetation, and not too much grass - we already have plenty of that nearby.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	No, as long as there is plenty of vegetation.

Select Box

No

**Q13** Provide any additional comments

Long Text

Why are we denying our historical side? Pioneers of Eltham should be valued. They planted European trees of which some are now significant. Why are they being denied any recognition?  
Keep significant trees of all types. Replacements will take 100 years. Loss of oxygen & habitat is significant already by loss of trees to date.  
Eltham is diverse. Whilst appreciating indigenous -it's a lot more maybe entrance to Eltham should display artistic creative side and a welcome.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

Indigenous / edible garden

The structured indigenous planting

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A linear path from north to south (rather than a loop)

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted / spread throughout the site, rather than in one specific area

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

No

**Q8** Please provide any additional comments

Long Text

I would like to see more indigenous planting and old native trees retained to provide habitat and wildlife corridor.

Under the tree removal section the text is:

Older and larger trees are more likely to drop branches, or cause root conflicts beneath the surface.

How do you think natural hollows are formed for our native wildlife that are dependent on hollows?

We should be retaining these old trees wherever possible.

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	Yes the pines should be removed and fantastic if the timber can be reused locally, however this area should be used for fauna and biodiversity rather than a focus on 'human activity' features.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Carvings
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	This area is better suited for 'human activity' features such as some of those proposed for area A.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text	This area is better suited for 'human activity' features such as some of those proposed for area A.

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text The Art Precinct as part of the Gateway, and that some dangerous trees will be pruned so they do not overhang the road or shared pathways.
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- Indigenous / edible garden
  - Looped pathway
  - Seating
  - The structured indigenous planting
  - Meeting circle
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A looped path similar to that presented, that also has an entry point to the north out to Main Road
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Yes
- Q8** Please provide any additional comments
- Long Text
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Yes
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box
- Unsure

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	Unsure if balance beams are safe as per see saws?
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Seats
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	Area B should be landscaped with safe designated parking if still used for floristry sales.
<b>Q17</b>	<b>Any comments on Area C</b>
Long Text

Q16	Any comments on Area B
Long Text	A 4G or 5G cell tower would be fantastic in this location. Reception here is terrible and as residents on Souter St, Eltham this impacts us everyday. We would love to share the beautiful landscapes and indigenous aspects of this gateway and having fast internet and phone reception will make this space more appealing.
Q17	Any comments on Area C
Long Text	Again a 4G or 5G tower to increase signal strength here would be fantastic as local residents on this street. Thank you for all your efforts with this masterplan, it looks amazing so far.

- Select Box No
- Q13** Provide any additional comments
- Long Text The biggest issue from a garden/wildlife perspective in Eltham that remains unchecked, and is becoming a bigger issue with every passing day is the skyrocketing population of Noisy Miners. Tall trees with wide expanses of cleared bush habitat in between provide them with their ideal habitat, particularly when mixed in with peoples love of nectar producing plants such as Grevilleas and Callistemons. I have watched them drive away our existing local population of Rosellas, Pardalotes and Thornbills, to the point that the only bird left in our yard is the Noisy Miner. Populations of Noisy Miners and other birds remain at a balanced level in any bush setting where the bush remains uncleared. My #natureinnillumbik posts in Instagram

show what we have, and what we are slowly losing.

**Q14** Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?

Select Box

Yes

**Q15** What is your preference for the re-use of these stumps?

Multi Choice

Other (please specify): Mulch, and replace them with She-oaks (Casuarinas) to attract a greater diversity of Australian wildlife.

**Q16** Any comments on Area B

- Ranking Indigenous / edible garden
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): No path
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text There is already too much built environment. The path just adds more construction. We need more natural grass and indigenous planting.
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box No
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box No
- Q13** Provide any additional comments
- Long Text Am happy these trees are being removed. Its not a great spot for a play park.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	Am very happy for the florist to be there and the site needs indigenous revegetation as an improvement for the gateway to Eltham. The new intersection is so ugly and badly designed that we need an inspirational avenue and entry to Eltham at this site.
Q17	Any comments on Area C
Long Text	We don't need an art sculpture here - I would prefer a manna gum please. There is such a huge footprint on the environment here with the road and existing footpaths - less is more.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	<p>Planting is not enough. We need a visible sculpture on the north side of Main Rd in the triangle at the corner of Falkiner St that speaks to or symbolises what Eltham represents. The existing stump denoted as a black spot in "B North" appears to be a coolamon carved tree and if confirmed I would object strongly "in a possible sculpture being made from it". I would expect that Wurundjeri people have input to this whole project.</p> <p>I would suggest that this carved tree should be recognised and become the basis for the design of all items intended to compliment the natural environment. Concentric circles are indigenous symbols meaning a place to settle, a camping place. I envisage a rusty iron sculpture of concentric rings symbolising life here over the ages to the present meaning a welcoming family oriented community.</p> <p>The elevated grassed area in "B North" could then become a garden of tree sculptures in a part circle illustrating the history of Eltham with space for future additions.</p> <p>In that way the gateway becomes a living entity.</p>

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

The structured indigenous planting  
Seating  
Meeting circle  
Looped pathway  
Indigenous / edible garden  
Log steppers/balance logs

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A linear path from north to south (rather than a loop)

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted around the wider path and meeting circle

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Yes

**Q8** Please provide any additional comments

Long Text

I d on't believe you need the spiral path, it takes away from the natural habitat

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Yes

<b>Q13</b>	<b>Provide any additional comments</b>
Long Text	I don't believe you need the fence along Main Rd. I like the path to be open, But you do need a wire fence around the drain.
<b>Q14</b>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
Select Box	Yes
<b>Q15</b>	<b>What is your preference for the re-use of these stumps?</b>
Multi Choice	Carvings
<b>Q16</b>	<b>Any comments on Area B</b>
Long Text	I am so pleased that you are working with Vicki Ward and MRPV on this project. Vicki was talking about this idea from the beginning of the Roundabout project. Whilst community groups were still debating the design of the intersection she was trying to garner support for this idea. It is terrific that Nillumbik have got onboard to make this happen.
<b>Q17</b>	<b>Any comments on Area C</b>

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

The structured indigenous planting  
Meeting circle  
Seating

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

Other (please specify): A simple path only

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

No

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

**Q6** Please provide any additional comments

Short Text

I would like to see a green and natural space of indigenous plants with a simple path & a few seats for passive enjoyment of a revegetated ecological sensitive part of the habitat link along the Diamond Creek.

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Yes

**Q8** Please provide any additional comments

Long Text

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

**Q13** Provide any additional comments

Long Text

Seating only.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Seats

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A looped path similar to that presented, that also has an entry point to the north out to Main Road

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

No

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

**Q6** Please provide any additional comments

Short Text

I support the indigenous planting but not in a separate area - we have done too much segregating! Just plant and regenerate the area with some edible plants scattered along the loop path

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Unsure

**Q8** Please provide any additional comments

Long Text

I would prefer a smaller / intimate circle for smaller groups

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

No

**Q13** Provide any additional comments

Long Text

I think Area A should be strictly for passive uses with the focus on regeneration/revegetation - there are plenty of play possibilities in Eltham Lower park. Certainly use the timber for the boardwalks and store for later repurposing for art works or protective fencing along the drain and Diamond Creek

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Seats

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text the attempt to replace trees removed for the concrete entry to Eltham
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking The structured indigenous planting
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box Other (please specify): no path. or as little as possible.
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Unsure
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box
- Q6** Please provide any additional comments
- Short Text Renovate the nearby picnic area and provide an indigenous garden there.
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box Unsure
- Q8** Please provide any additional comments
- Long Text move the meeting circle to the nearby picnic area
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?
- Select Box
- Q11** Please provide any additional comments
- Long Text
- Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?
- Select Box
- No
- Q13** Provide any additional comments
- Long Text I object to the criteria being used for tree removal throughout the project. Dead trees are important habitat and should only be removed if they cannot be made safe (ie prune them and leave the main stump with hollows for habitat). I object to this area being renovated for higher human use. It's value as habitat within the Eltham Gateway should be preserved and enhanced, rather than increasing infrastructure for humans. The nearby picnic area could instead be renovated to be more natural, with meeting circle, stepping logs and sculpture etc. I like the idea of re-use of timber from removed pine trees, but not for it to be used where proposed.

I believe there is an existing natural path around the outside of the miniature trains (east and north sides of the train area) which goes through this area. is it going to be fenced off due to the redevelopment of Area A?

**Q14** Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?  
 Select Box

**Q15** What is your preference for the re-use of these stumps?  
 Multi Choice

**Q16** Any comments on Area B  
 Long Text  
 I object to the criteria being used for tree removal throughout the project. Dead trees are important habitat and should only be removed if they cannot be made safe (ie prune them and leave the main stump with hollows for habitat).

**Q17** Any comments on Area C  
 Long Text  
 I object to the criteria being used for tree removal throughout the project. Dead trees are important habitat and should only be removed if they cannot be made safe (ie prune them and leave the main stump with hollows for habitat).

- Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?
- Short Text it attempts to mitigate the disaster that is the fitsimmons lane concrete and tarmac abomination project
- Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference
- Ranking
- The structured indigenous planting
  - Mix of steel/timber fence
  - Seating
  - Indigenous / edible garden
  - Log steppers/balance logs
  - Spiral Path
  - Looped pathway
  - Meeting circle
- Q3** Area A proposes a looped circuit path. Please select your preferred option
- Select Box A linear path from north to south (rather than a loop)
- Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?
- Select Box Yes
- Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)
- Select Box Planted / spread throughout the site, rather than in one specific area
- Q6** Please provide any additional comments
- Short Text
- Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?
- Select Box No
- Q8** Please provide any additional comments
- Long Text circle means more concrete/tarmac (i.e. makes the fitsimmons lane disaster worse) and less green wedge
- Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?
- Select Box
- Yes
- Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text Will make a a much better look getting into Eltham

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

Looped pathway  
Spiral Path  
Seating  
Indigenous / edible garden  
Log steppers/balance logs  
The structured indigenous planting

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A looped path similar to that presented, that also has an entry point to the north out to Main Road

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted / spread throughout the site, rather than in one specific area

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Unsure

**Q8** Please provide any additional comments

Long Text

Meeting area can be getting very busy, and it might be too small for a lot of people. I would include seating so people can enjoy the pathway and the garden. The area can be a focus to walk around and look at the plants and flowers but not put the aim on a meeting point, people can meet up in a park.

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

No

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Yes

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A linear path from north to south (rather than a loop)

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

No

**Q8** Please provide any additional comments

Long Text

I feel it's an odd place to put such a concept.  
I agree the area could use tidying up, especially around the bus stop, some extra planting/sculptures etc & new bike & walking paths but, is Area A really a good use of taxpayers money?  
Wouldn't this concept be better placed over near the current Eltham Lower Park playground area away from a busy main Rd?  
I don't see visually what it adds to the Gateway to Eltham

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

**Q11** Please provide any additional comments

Long Text

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

<p><b>Q13</b></p> <p>Long Text</p>	<b>Provide any additional comments</b>
<p><b>Q14</b></p> <p>Select Box</p>	<b>Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?</b>
<p><b>Q15</b></p> <p>Multi Choice</p>	<b>What is your preference for the re-use of these stumps?</b>
<p><b>Q16</b></p> <p>Long Text</p>	<b>Any comments on Area B</b>  I'm pleased the long standing Florist is being allowed to continue trading from the same place

Long Text

There is not a suitable place for this comment - so have used this section.  
We think the priority is to create a two lane bridge in both directions over the river. This is incredibly risky in fire season as people will be get stuck here and not be able to escape in the event of an emergency.

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?

**Q1** In a few words what do you like most about the Eltham Gateway conceptual master plan?

Short Text

Range of natives, active use of area as opposed to just plantings; visual elements of rocks, sculpture, steppers, could be a destination point rather than an area to be bypassed

**Q2** Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family? Rank in order of preference

Ranking

**Q3** Area A proposes a looped circuit path. Please select your preferred option

Select Box

A looped path similar to that presented, that also has an entry point to the north out to Main Road

**Q4** Area A proposes an indigenous (Wurundjeri) garden. Would you like this included?

Select Box

Yes

**Q5** Please select which is your preferred option for an indigenous (Wurundjeri) garden (with informative signage)

Select Box

Planted around the proposed spiral path

**Q6** Please provide any additional comments

Short Text

**Q7** Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design?

Select Box

Yes

**Q8** Please provide any additional comments

Long Text

I think this helps to become a destination rather than just an area to be bypassed on the way to somewhere else.

**Q9** Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design?

Select Box

Yes

**Q10** The proposed fence in the landscape concept design is for a mixed construction, using milled timber from the site pine trees, with steel sections, rock sections, and is, in itself, a piece of art. Do you support the proposed style of fence?

Select Box

Yes

**Q12** Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan?

Select Box

Yes

**Q13** Provide any additional comments

Long Text

I like the idea of using as much of what is already there as possible

Q14	Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items?
Select Box	Yes
Q15	What is your preference for the re-use of these stumps?
Multi Choice	Carvings
Q16	Any comments on Area B
Long Text	<p>This is obviously a secondary area due, in part, to the lease to florist &amp; associated parking. I do feel this does not lend itself to the best design for the area - causes fractured planting visibly &amp; physically &amp; will look out of place in thie premium area as a gateway into Eltham. I have long wondered how this lease occurs &amp; why it has been allowed to exist for so long, how much they pay, how they get their electricity etc. I also feel that their need to make a living should not be held above the plans a council has in a chance of a generation to achieve the look we want for Eltham for the next 10 years or so. Difficult to bring it into the plan at a later date. Additionally I think the allocation of parking space if way too generous! There are usually only a couple of cars in the area at most times. This lease size, if it must be honoured, needs to be justified on more grounds than the fact it assists their business! Is the amount they pay for the lease commensurate with a parking area more typical of medium sized business? If not, then they either need to pay the going rate or the number of places needs to be renegotiated.</p> <p>So ideally I would like to see a continuation of the planting in this area to include the floris/carpark area, perhaps with a small scale commercial lease area for a coffee cart, food van or similar.</p>
Q17	Any comments on Area C
Long Text	<p>Area C seems to be more typical of other road-side plantings by necessity. I think a prominant art work visible on entering Eltham would be good - to set the tone. I would like to see something reference sustainability/upcycling/repurposing...maybe something linking to Montsalvat heritage with large timbers/metal...could be made with items from Montsalvat or Matcham Skipper's old place?</p>

Multi Choice

How did you hear about this consultation?

THIS PAGE HAS BEEN LEFT INTENTIONALLY BLANK

Question Number	
	QUESTION 1
Response No.	In a few words what do you like most about the Eltham Gateway conceptual master plan?
1	I like the inclusion of native plants and edibles, and the acknowledgement of the traditional owners of the land and indigenous culture in general, but I worry that the overall design is too cultivated/landscaped, and will look too man-made.
3	I am glad there is thoughts being given to this design. General emphasis should be on vegetation and artwork. However, there is no space for comments on section a, What happens to DV Railway?
4	I don't like much of it at all. It does not reflect the majority view of the respondents to Vicky Wards survey. The plan is too artificial formal and contrived.
5	I am very keen on a sizeable sculpture, but it must be beautiful. I would really like for the public to be able to vote on possible designs. Please consider local metal sculptor Tim Read.
6	I like the fact that the idea of an Eltham Gateway is being addressed and discussed.
7	Indigenous revegetation
9	That it appears to be making some commitment to retaining a bushy welcome to the gateway to the green wedge shire
10	Respects the Indigenous custodial ownership and vegetation, level of awareness of environment and art as strong features of the Eltham community.
11	Good plan, can't wait to see it being initiated
12	I don't like the plan. The current gateway represents Eltham perfectly. There are enough kids parks and manicured gardens existing already
15	I like that something is being done.
16	The indigenous planting on either side of the road, over time this will contribute to a sense of immersion within the vegetation - which is so important to the place of Eltham
17	I like the emphasis on a treed landscape with low impact features interspersed along a path through the large Area A. The treatment of the other areas is sympathetic with a sculpture as a defining feature.
18	The use of "White Trunk Trees" defining the verges of "The Gateway". The removal of and replacement if non indigenous vegetation.
19	Natural looking vegetation and other features
20	I want less paths, steps and sculptures and MORE TREES!!!
21	Creation of a well treed gateway, both sides of the road. Suggestion of white trunk gums sounds attractive.
24	The planting proposed. The proposed use as a place to sit and dwell is inappropriate due to traffic noise.
25	An attempt to restore the lost natural gateway to Eltham
29	The removal of non-indigenous growth to allow for regeneration and planting of indigenous plants and trees
31	I think it has been very well thought out and is comprehensive in its scope
32	Green space
33	The natural feeling of it.
34	As an entry to eltham- planting and access
35	Seems effective in flow of traffic HOWEVER where are the bike lanes

Question Number	QUESTION 1
Response No.	In a few words what do you like most about the Eltham Gateway conceptual master plan?
36	Planting of indigenous vegetation and beautifying of public space on both sides of MainRoad
38	An opportunity to green the entrance into the Eltham Gateway to try to offset some of the environmental impact of the extensive infrastructure works involving removing the treed areas and roundabout close by
39	The looped pathway and meeting circle
40	The removal of weeds and non native vegetation; the retention (and hopefully the enhancement) of the green space
42	Please leave the trees and plant more. This is the only real contribution to a healthy environment for us , Melbourne and future generations. Don't include playground, paths, monuments. Threes are the monuments and places to play as aboriginal di
43	nothing. why is it necessary to urbanise this bushland?
45	the intention to create a green gateway
46	Meeting circle and indigenous garden
47	Only the tree replacement plans.
50	Bird life habitat
51	Promoting and maintaining the bush feel of Eltham and the Green Wedge, the indigenous plkantings and the use of natural materials.
52	Too extravagant - less wank and more trees
54	indigenous edibles
56	It looks great , lots of new plantings and public spaces to experience
58	Indigenous planting and artwork
59	It is really interactive with interesting areas
62	Wonderful to see a indigenous planting as a gateway to Eltham
63	That some replacement of lost trees & shrubs will be made
65	The variety of features
66	More trees, less hard surfaces
67	The planting of indigenous plants and restoring of a green canopy of trees to replace the unnecessary removal of trees for the Fitzsimons Lane Main Road development
69	Nothing really Do not want area a. Stop humanising everything
70	It is trying to rectify the appalling damage to the environlent created by the Labour government
71	Lots of trees, a lovely entry plan to such a wonderful suburb!!!
72	I and my family have lived in Antoinette Boukevard for over 50 years and worked tirelessly to protect the wildlife and flora and unique character of this area. I most certainly object strongly to area A being used for congregating. It must be kept bushy

Question Number	
	QUESTION 1
Response No.	In a few words what do you like most about the Eltham Gateway conceptual master plan?
73	The removal of non native trees/vegetation. The opportunity for passers-by to stop and get a snapshot of what Nillumbik means and feels like.
76	Looks great, a "welcome gateway" would be a lovely addition to the area.
77	Nothing - the questions are contrived to illicit specific responses
78	Revegetation, landscaping
80	Decent number of new native tree plantings
81	Helps to ameliorate the tragic loss of our beautiful Eltham roundabout. We do need a new gateway. Need lots of additional planting to balance the loss of so many trees.
84	I like the indigenous elements incorporated in the master plan
85	It will help to soften the concrete monstrosity that has replaced the old roundabout
86	Any removal of weeds and non native plants. The planting of new Australian native plants
87	Vegetation for wildlife corridor
91	The section on the plan that do not alter... including the indigenous trees and shrubs.
92	Area B and C
94	revegetation with indigenous flora
95	Replanting But Not destroying significant trees.
96	Greening the parcels as much as possible.
97	Extra plants, seating, walking path
98	It's fine, but disappointing to see community once again not listened to
100	That an underused space will be utilised.
102	The Art Precinct as part of the Gateway, and that some dangerous trees will be pruned so they do not overhang the road or shared pathways.
103	The native plants and recognition of First Nations.
104	The indigenous elements
105	A fitting tribute to 'where the bush meets the city'.
106	Indigenous planting
108	Nothing at all
109	Indigenous planting as a counter to the sea of bitumen and concrete that is now the gateway to Eltham

Question Number	
	QUESTION 1
Response No.	In a few words what do you like most about the Eltham Gateway conceptual master plan?
112	That is will create a feeling of returning home to the beautiful GreenWedge.
114	An attempt to repair the damage done
115	The incorporation of indigenous planting
116	The possibility that it will stave off any plans to duplicate the bridge
117	That the Gateway is finally being restored with native planting
120	the attempt to replace trees removed for the concrete entry to Eltham
121	it attempts to mitigate the disaster that is the fitzsimmmons lane concrete and tarmac abomination project
122	Layout & Indigineous planting generally good
126	There are trees being replanted
127	Will make a a much better look getting into Eltham
131	The re-greening of the 'gateway' and the proposed public artworks.
132	Range of natives, active use of area as opposed to just plantings; visual elements of rocks, sculpture, steppers, could be a destination point rather than an area to be bypassed

Question Number	
	QUESTION 3
Response No.	Area A proposes a looped circuit path. Please select your preferred option. These are the responses for anyone who elaborated on their selection 'Other':
4	Other (please specify): No looped path. Area A should be a natural revegetated area with indigenous plants to provide the continuous wildlife corridor along the creek. Canopy trees need to be replaced in this area.
8	Other (please specify): A path that meanders through from south to north, not straight and not circling/spirally to an artificial 'destination'. A simple path.
13	Other (please specify): none
16	Other (please specify): Whilst I appreciate the intent of the garden and looped path I strongly believe this is the wrong location, the focus should be on revegetation of this zone to help bring back a sense of immersion and place through planting - not the addition of further hard landscaping elements, sculptures and fences which add to a sense of urbanisation. For pedestrians, cyclists and road users this is essentially a transitory area, to increase the planting would really add to this experience. This kind of space would be a great addition to Lower park where people spend time, there are a number of areas adjacent to other activity spaces that are in need of landscaping.
23	Other (please specify): I support the design that will allow for the highest concentration of trees, to recreate the original feel of the treed roundabout signalling the gateway to Eltham. If a path is included, suggest it have entrances on both sides
38	Other (please specify): A looped all access (width/ surface treatment) pathway connecting at the eastern and western ends with the Diamond Creek Trail
42	Other (please specify): None of the above, only native vegetation to have a bush like entrance to the shire
47	Other (please specify): Just a simple pathway leading to a simple seating area.
63	Other (please specify): We would prefer that the area is cleared of weeds, old trees and logs etc left as they sit for wildlife habitat
66	Other (please specify): Trees and dense bush, there is plenty of open space in the park
74	Other (please specify): Area A doesn't need any paths or other built form landscaping. Simply just remove all non native/indigenous plants/trees and plant with indigenous planting. Save the money please.
77	Other (please specify): Leave area A alone - the only thing required is to control the weeds. No need to pretend to replace trees cut down at the roundabout by cutting more down to put in a contrived path. Why do we constantly have to destroy the natural bush?
80	Other (please specify): I do not believe there should be a pathway, meeting circle or spiral pathway at all.
81	Other (please specify): a meandering path running north/south and connecting to the spiral path
88	Other (please specify): No non natural content. The car park is enough tarmac and concrete.
98	Other (please specify):Keep it green, planmt natives, simple path, limited seating.
101	Other (please specify): A very limited pathway to pass the area that should aim to keep human traffic away from this area so it can be regenerated for animal and bird use undisturbed
106	Other (please specify): No path
111	Other (please specify): A simple path only

Question Number	
	QUESTION 5
Response No.	Area A proposes an indigenous (Wurundjeri) garden. Would you like this included? These are the responses for anyone who elaborated on their section 'Other':
7	Other (please specify): In as many places as possible
81	Other (please specify): Hard to know what would work best without knowing plants and maybe this is best decided on what works best
83	Other (please specify): Indigenous plants to be spread throughout the site with edible Indigenous plants around meeting circle and spiral pathway
87	Other (please specify): separate area

THIS PAGE HAS BEEN LEFT INTENTIONALLY BLANK

Question Number	
	QUESTION 6
Response No.	Additional comments for indigenous (Wurundjeri) garden (with informative signage)? These are the responses for anyone who added additional text:
13	This is a great way to change the look of Eltham this whole proposal is terrible
15	It is important that as close as possible to the ground and natural vegetation be restored to preserve a sense of the area.
16	This could be a valuable resource for the community, but it is in the wrong location, it is too close to the road to be peaceful and encroaches further into the vegetation band of the creek. Perhaps more adjacent to the park at Hohnes Rd Playhouse, within
17	A sign showing the plants in the area would be good
18	Expensive to maintain and doesn't add to a new visual "Gateway"
20	I just want as much planting as possible to help drown out the noise of what is now a highway at my door
21	Would need to be drought resistant
24	An indigenous garden is a lovely idea but not in this location. Anything in this location will be drowned out by traffic noise. Fabio's paddock or another quieter more tranquil location is better suited for a garden.
38	If this is required I would suggest it is placed in Area B
42	Only plant native vegetation to have a bush like entrance
43	please don't do this. native trees, native bush, a path through it. what could be better? certainly not this proposal.
47	This was NOT part of the community's feedback
52	Let's just have simple, native flora that is perennial and encourages wildlife
63	This should be located behind the flower seller area and Area A left as a wildlife refuge/sanctuary
66	The garden won't be maintained and just become weed infested, or dry out and become a dust bowl
67	I do not feel this is the most suitable area for an indigenous garden. The concept is a great idea but not in this location.
74	Nothing formal in this area of the plan please. As per above comment. Save the money. Not needed. Eltham gateway should just be about feeling like you're coming home to the bush.
77	Per my comments above. Area A is completely wrong focus. If anything, attention should be directed to Areas B and C on the north western side of Main Road on the outer radius where one's eyes are naturally drawn to either arriving or leaving
80	The pathways only result in reduced vegetation space and habitat for animals. I believe the pathways will detract from the vegetation space.
92	The general consensus from the community was that Area A should be a green and natural space that will revegetate the habitat along Diamond Creek. This proposed design has too many features and should be simplified so that this revegetation can take place
101	Put one on the other side and leave A as an indigenous corridor
111	I would like to see a green and natural space of indigenous plants with a simple path & a few seats for passive enjoyment of a revegetated ecological sensitive part of the habitat link along the Diamond Creek.
119	I support the indigenous planting but not in a separate area - we have done too much segregating! Just plant and regenerate the area with some edible plants scattered along the loop path
120	Renovate the nearby picnic area and provide an indigenous garden there
126	I would prefer the look of some non-natives, especially some deciduous trees.

Question Number	QUESTION 8
Response No.	<b>Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design? These are all of the submitted, worded responses:</b>
3	I don't think there would be space for this (refers to meeting circle). Would like emphasis to be on indigenous revegetation in this area.
9	I think the area should largely be planted out there are plenty of other places for people to gather. Whenever there are gathering places the plants are subject to trampling and inevitably there is rubbish left behind.
10	I think it is important to also have a northerly access path to the meeting circle so people walking in both directions have a ready access path to the meeting circle and spiral. Otherwise I suspect people walking from the north will tread a path through the vegetation regardless, rather than walk the extra distance via the existing proposed pathway.
11	I think the Aboriginal and white settlement should be included. It would be great to incorporate Local artists and Aboriginal artists pieces around the gateway and or along the paths. Would be awesome community engagement
13	Again this is a terrible idea
15	Would rather the vegetation was the primary element here
16	The same comments as above, even more so this feels like a really marginal area to locate a meeting circle which surely deserves a more serene and generous location away from the road
17	I think the "creek side" path is good but the loop back near the shared path beside Main Road is not needed. Instead, there should be a connection back to the shared path near the northern end. I also think the spiral pathway is too busy and should be deleted.
18	I would prefer a less structured area that has wooden seating (with backs) for resting and enjoying the natural environment.
20	No one is going to sit and meet along a main busy road... just plant more trees to muffle the sound of the cars and give us back our green gate which is why we live here.
21	The area is relatively small so a meeting circle would mean more gravel area rather than keeping things green
22	We would prefer the indigenous plants to be dispersed in a natural fashion as they would be in nature. The spiral concept would be our least preferred planting.
23	It would be OK to have a meeting circle further inside the park in areas that did not originally have trees, but it should not impact the view from main road which I would prefer to focus on recovering lost trees
24	I pass this location daily on my way to the river and it is very noisy and definitely not conducive to sitting and spending time at. There are far better locations for this kind of activity. This should simply be planted with native vegetation.
25	I prefer the whole area to be as natural as possible.Restoration of native tree cover my priority.
26	Total support for the plan
28	I appreciate the concept, however it would be better situated closer to a waterway than main rd. It would be unlikely that people would choose to meet there and gather, but rather move through this space to access the park.
32	Noise abatement is an issue
37	Local preschools and schools to congregate and learn about the area or learn in an outside classroom. Friends of Groups to meet for lunch or a cuppa whilst attending to the maintenance of the surrounds. Family and friends to gather in a secure site near a busy road safe a secluded
38	I consider Area A should primarily be a passive creek side environs. If a meeting circle is to be provided I feel this should be a very informal space that includes a couple of seats with backs and arms to provide support for all users. Appropriate room adjacent to these seats should enable access for people using wheelchairs or other mobility equipment.
40	I would prefer to maximise the green space and vegetation as much as possible to promote bird and insect life I would prefer Area A to only have the looped walking track with seating /rest areas and not lose space to features such as the spiral path and meeting circle. At the exit /entrance points to the looped path I would like to see bins and access to water
41	With a speakers dias please. And banked seating like at the bottom of the Warrandyte Bridge
42	Please only plant native vegetation particularly trees to grow a canopy entrance and a bush like environment which no human intervention. That would be very appreciated to future generations and provide relax and oxygen, a place to play and learn. No building, seats, paths, monuments. Leave it as virgen as possible. Have a huge canopy. This is what we love
43	There are enough humanized, urban parks already. This urban development is not needed. I can't rationalise "improved" with this proposal.
47	An area of seating is welcome, with benches separated at least 1.5m apart. This should be accessed by just a simple pathway in a grassy area with views of new treed and grassed areas only.

Question Number	
	QUESTION 8
Response No.	Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design? These are all of the submitted, worded responses:
	49 Ability to comment is too restricted. Not clear how many and which trees to be removed.
	52 Takes up space that could otherwise be greenery
	54 This is supposed to be a welcoming gateway. The steel/timber fences will make "a block", so not be welcoming. I guess you want the fences due to the play areas. But why have play areas here? There are two play areas in Eltham Lower park already. This is close to a main road, not an ideal meeting and play site. Do we really need or want a meeting area next to
	56 The meeting circle is a fantastic idea , including rocks and timber steppers. I could see my daughters school class even going there for indigenous education and learning / play oportunities
	59 A great place for people to congregate for catch ups
	61 The spiral seems unnecessary and overkill
	62 It seems too close to a noisy road for me to want to sit and meet for any length of time. A short sit to watch kids climb maybe
	63 The meeting circle is a fine idea but it should be located away from Area A at Site B Please leave Area A as a natural area and not pretty it up for human use. There is plenty of area on the other side - B that can be used for these valid ideas.
	66 Because it would attract foot traffic, should be dense bush and trees
	67 I am unsure as to why council feels the need to overdevelop this area. Most people who live in Eltham come here for the green spaces and natural Bush look. This is gradually being eroded and overdeveloped. The gateway to Eltham should remain as natural as possible. Development doesn't have to mean destruction. Also with the poor record Australia now
	70 Not sure how to attract people to the circle area
	74 As per both above comment
	77 As above - leave it alone
	80 As above, this feature only serves to reduce space for vegetation from the area and turn it into more meaningless gravel.
	83 rather than seating as a bench, rocks or logs should be used. no plants other than Indigenous plants to the Eltham area should be used (im assuming Edendale will be the main source of plants)
	84 Yes in consultation with Wurundjeri Woi wurrung. Would they like a meeting circle? Check how they would like it to be installed.
	89 I think the Flower Stall should be incorporated in all the designs. It is popular with locals and people travelling through. To me it is an integral part of the Gateway into Eltham. I am a customer with no financial interest in this business but use it very regularly.
	92 Area A needs to prioritise revegetation with a simple path and seating
	94 Given the amount of trees and vegetation removed for the recent road works, I think the focus of this area should be on revegetation, both from an aesthetic, 'welcome to Eltham' perspective and from and environmental perspective. A meeting circle is a great idea and could be placed on the grass area left on the other side of the road or in the extensive adjacent
	98 So many trees destroyed for this "necessary" upgrade. Plant trees, this is supposed to be the Green Wedge after all.
	99 I would like to see more indigenous planting and old native trees retained to provide habitat and wildlife corridor. Under the tree removal section the text is: Older and larger trees are more likely to drop branches, or cause root conflicts beneath the surface. How do you think
	100 Meeting circle is a great spot for cyclists to use as a meeting point.
	101 The meeting circle is a good idea but behind the flower seller area NOT where the vegetation needs weed removal and to be a wildlife corridor
	103 This question is poorly written - I suggest rewriting it to make your point clear.
	105 This will become an area for young to loiter at night.

Question Number	
	QUESTION 8
Response No.	Area A proposes a meeting circle with seating types. Would you like the meeting circle to part of the final design? These are all of the submitted, worded responses:
106	There is already too much built environment. The path just adds more construction. We need more natural grass and indienous planting.
109	I see this as a meeting area for quiet contemplation.
110	I d on't believe you need the spiral path, it takes away from the natural habitat
115	Consider shade and water fountains for this area. Could it be used for markets perhaps? Similar to Warrandyte?
116	I'm inclined to think this should be more about nature than humans
117	Add a wooden plaque stating Eltham Gateway and welcome to wurundgeri country somewhere where it's visible
119	I would prefer a smaller / intimate circle for smaller groups
120	move the meeting circle to the nearby picnic area
121	circle means more concrete/tarmac (i.e. makes the fitsimmons lane disaster worse) and less green wedge
122	Edible garden not appropriate in this area.
124	Mine are second guesses after a career in countryside planning in England & Wales,,,
127	Meeting area can be getting very busy, and it might be too small for a lot of people. I would include seating so people can enjoy the pathway and the garden. The area can be a focus to walk around and look at the plants and flowers but not put the aim on a meeting point, people can meet up in a park.
128	feel it's an odd place to put such a concept. I agree the area could use tidying up, especially around the bus stop, some extra planting/sculptures etc & new bike & walking paths but, is Area A really a good use of taxpayers money? Wouldn't this concept be better placed over near the current Eltham Lower Park playground area away from a busy main Rd? I don't see visually what it adds to the Gateway to Eltham
132	I think this helps to become a destination rather than just an area to be bypassed on the way to somewhere else.

QUESTION 11

Response No./ Submitter	Area A proposes a steel and mixed timber fence along Main Road, separating an improved Area A from the Diamond Creek trail bicycle path. Would you like the proposed fence along Main Road to be a part of the final design? These are all of the submitted, worded responses:
9	I think all materials should be sourced as locally as possible.
15	Pine trees (Pinus radiata) do not produce timber suitable for fencing unless it is deeply penetrated by pressure treatment with preservatives. Some of the trees I recall are Cypress, but this is also not particularly durable and is also difficult to treat. This would be expensive and inappropriate use of funds unless the work is donated. If this goes ahead it may be that the Timber Preservers Association of Australia and Forest and Wood Products Australia Limited (FWPA - the industry funded promotion body) might find the cash as a way to promote timber. Even above ground, the untreated pine timbers will not last a decade and will create a safety hazard as they fragment and rot.
35	Need a bike lane from Bolton Street thro Main Roas Eltham
47	A low cost and low maintenance project is required. Fences are unnecessary and would be difficult for mowers to access properly.
55	The wall as suggested is too prominent. I would prefer a curving mudbrick wall that blends in material and colour with the vegetation, with eg colourful tiles illustrating native flora and fauna,
78	Do not include pine.

QUESTION 13	
Response No./ Submitter	Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan? These are all of the submitted, worded responses:
1	Most of these sound alright, but I don't know what you mean by tee-pees. If this is some form of appropriating North American (Turtle Island) First Nations designs, that would be a hard no. Some wooden play equipment sounds like fun, but I would prefer the overall focus of the area be on vegetation and nativa flora/fauna.
3	I have no idea of the scale or height of the proposed fence or its design or purpose. What is its purpose? Don't want to keep people out? Would not want it any higher than necessary . Would not want it to obstruct views of vegetation Where is the DV Railway in relation to this fence, design?
4	The recycled timber should be used but not for the above items and certainly not in Area A.
6	I believe the design is trying too hard to please everyone especially close to a busy main road.
7	I am generally supportive of this but not of the construction of tipi structures specifically. This is culturally appropriative of First Nations Americans cultures and is not in spirit with the respect due to Indigenous peoples.
8	My understanding was that this 'new gateway' was to be a way to revegetate the area on both sides of Main Road with canopy trees to try and replace the homecoming feel that we had lost and to enhance the wildlife corridor along the creek. Something simple and natural! It takes a lot of skill to design a 'garden/landscape' that looks as if it has always been there. Gordon Ford could. The design we are commenting on is too artificial, too 'organised.'. We just want trees, bushes, ground cover to walk through. Like the nature walk along the creek in Eltham Lower Park. Nothing more omplicated. I am confused by 'indigenous'. If you mean that the plants used will all be indigenous to the area, then, Yes. If you mean an artificial garden of indigenous plants, maybe edible, that were used by aboriginal people then, No. Reusing the felled timber is good but not sure about play equipment in that area. If the area is purely trees and plants with meandering paths then I don't see the need for a fence which would only cause more maintenance costs re whippersnipping.
9	I don't think this should be a play area, I think it should be a bushy space with ground covers, mid story and tall plantings, encouraging birds and insects not people.
10	I am for the idea of the fence as it gives emphasis to the meeting circle and spiral and general area as a special almost sacred space. But I am concerned that it should have a northerly opening in the fence to give access to people walking from the north. I am also concerned about the durability of re-using the pine from cut down trees for fencing or for log steppers, balance beams, tee pees or sculpted play items, unless there was some way of preserving the wood without having to use any nasty chemicals like the copper chrome arsenic used in treated pine logs. Perhaps the wooden components of these items could be made from the harder wearing wood of the removed older eucalypts?
11	I think it would be great to include the dead trees in some form in the design. It supports recycling and most importantly respect for the local environment
12	There are an abundance of children's playgrounds existing. Do not cut down existing trees to make play items.
13	The termites would love this, and the rot would be great
14	Please have Leigh the chainsaw carver create some carvings from these stumps
15	See above comments. The timber will not be not fit for this purpose.
16	As above, I believe that the further addition of hard landscaping such as fences, play items, sculptures etc is in the wrong location. It will take away from the opportunity to create more depth in the vegetation around the creek and would be far better suited to hohnes park area
17	I think we should have noth seats and a carving (see below)
18	I don't believe a structured play space is suitable for this area.
21	I would like the fence to be minimal and as natural as possible, just to keep cyclists and pedestrians on the outer path.
22	We really don't see this area as a type of playground. There's the whole of Eltham South Parklands for recreational play.
23	It would be OK to have a play area in areas that did not originally have trees, but it should not impact the view from main road which I would prefer to focus on recovering lost trees
24	Reuse of materials is an excellent idea, but these activities are already supported in nicer locations. There is an excellent playground nearby and also a sitting area overlooking the river as well as wetlands with a range of seating. Having grown up exploring this section of the Diamond Creek this is not a nice place to dwell and in my opinion won't be utilised in this way.
29	There is a playground nearby already
32	Plenty of structured playgrounds nearby. Keep it passive
37	Milling timber onsite for reuse should be completed wherever possible. Turning weedy trees into non-structural timber elements in the landscape is not only creative and very Eltham, a cost saving to the project. Plaques mentioning 'I was made from 50yr old trees from this site' has a good ring to it...

QUESTION 13

Response No./ Submitter	Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan? These are all of the submitted, worded responses:
38	I consider Area A should not include the detailed spiral design depicted in the concept plan and should predominantly be a low key informal area to encourage and allow passive recreation. I don't support provision of features to support active play in Area A as there are already two established playgrounds close by in Eltham Lower Park as well as extensive open space areas there for a range of other activities. Area A should retained as a bushy environment continuing the greened wildlife corridor along the Diamond Creek.
39	I support the re-use of timber from the removed pine trees, to be recycled as a combination of log steppers, balance beams, tee pees and sculptured play items if these are incorporated along/into the looped pathway with minimal los of ground / vegetation / trees / habitat.
42	The great contribution we can do to our inhabitants and Melbourne in general is to plant trees,include native cegetation. This area is Melbourne lungs. We have lent of playgrounds. We don't need more of those but to recover trees that are being lost.
47	Reuse the timbers elsewhere, perhaps for a carved feature/figure. Play items, log steppers and balance beams were NOT proposed or suggested in Vicky Ward MP's survey responses. We just want grassy and indigenous treed areas. Almost 80% of the 370 respondents indicated their preference for a natural re-vegetated area.
50	Small bird habitat should be the priority. Eastern Spinebills , wrens etc Dense spiky planting . Need to keep fox numbers down. Don't want habitat that noisy minors and larger native birds will dominate
54	but why have a play area so close to two other play areas in Eltham Lower park and why have it so close to a main thoroughfare.
55	There is a play area nearby. This area is too close to the road, There is no reason for anyone to linger there.
56	This would be a great way to include the history of the site and use the existing trees and create sculptures from them and double as play spaces for kids and adults alike which is so needed at this time, so important to have more interactive outdoor spaces in nillumbik and educate us on indigenous bush tucker foods.
59	I love tha the timber is being reused
62	Love this type of play area for kids and adults with dogs alike.
63	As above - none of this "Development" is appropriate for Site A it should be part of Area B
64	Area A. With our State of the Environment in mind, Please remove all the weeds (Pines are weeds) Cover the area with Indigenous Plants — those species which would have been there before Settlement. Continue removing weeds and caring for the plants. ( There will be a seed bank, with some weed
66	Just nature, so you can house the animals from the destroyed roundabout vegetation.
68	Main concern is provision of clear signage for cyclists and walkers through from Westerfolds Park onto miniature railway on to and through the creek parkland which in my experience were a maze for the visitor who wanted to reach Eltham central area.no signs or inconsistent style of signs was a problem The new trail will draw people from all over east and provide visitors all along
69	Leave it all as bush. Build up the bush No fences, be inclusive Stop blocking people Humanising Have only trees Be inspired by Bruno's sculpture garden in Marysville
72	This survey is restrictive and manipulative with no option to disagree. Especially area A should NOT be used by people. It is imperative that the banks of the creek and adjoining areas be kept undisturbed for the preservation of wildlife and nesting birds. MUST be bushy and not disturbed by people walking or congregating This end of Duamond creek and the banks and land adjoining the creek are the last refuge for our eunique wildlife - which are lready struggling to survive. I am a resident who has lived in this area for over 59 years.-and strongly object
73	The use of milled timber from existing pine trees, especially cypress pine is a great idea. Any large rocks used should be representative of local geology if manageable. Sedimentary mudstone similar to Castella Stone would work well.
74	As per above comments nothing formal is needed. If council is set in wasting money on an area that is unlikely to be used (given the two other playgrounds already there) then yes, fine. Use the wood from the cut down pines.
77	Leave Area A alone
78	Repurposed pine does not age well and looks cheap very quickly. Using it as mulch would be putting it to better use.
81	There is already a playground not too far away. This space could be more reflective, contemplative, quiet place. Prefer more emphasis on the garden and plantings.
83	its great to supply kids with a nature play space. the use and design of a fence should consider whether it could prevent invasive pest species from entering the area and causing damage. the use of materials for the fence should should only use recycled and natural materials, and not use steel unless recycled.
84	I don't think the fence and rock should be a piece of art (this seems forced upon the artist), just make it fencing instead. Keep it simple. I strongly support materials being recycled

QUESTION 13

Response No./ Submitter	Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan? These are all of the submitted, worded responses:
87	Keep it simple
88	The removal of the roundabout and trees has urbanised the landscape enough. The natural barrier between urban growth and Eltham has been destroyed. Addition of steel barriers and engineered pathways will further undermine the transition.
89	Could you please also consider placing a large art wall and Indigenous trees and bushes at the southern end of Porter Street ELTHAM. The noise level of the traffic has increased substantially since removal of the dense plant life on roundabout. Feel like Im living on a noisy freeway rather than a side street. Major Road Projects Vic tell me via email that "trees do not block noise".
91	My last comments disappeared when I referred to the plans attached. Frustrating!!! The plan demonstrates what happens when a Landscape Consultant is given the opportunity to promote themselves with articles in Landscaping journals. They are trying too hard, and the plan is over-contrived in design. The plan needs to prioritise habitat, Indigenous planting including canopy trees, and acknowledgement of Wurundjeri. If Wurundjeri expressly WANT a chat room, then include it. Likewise, if Wurundjeri expressly want edible plant materials, include these with an information plaque. An under-maintained veg garden will be great for the initial centrefold, and embarrassing after that... WORSE... it spoils the opportunity to heal the land by returning it to a pre-European typology. Better-informed briefing to the consultants is required in this instance. Nillumbik is not, surely, trying to produce a post-modernist landscaping (or similar), but endeavouring to create a bush-GATEWAY. Get landscapers out, unless the brief can be directed at being less contrived.
92	Space needs to be given to proper revegetation; if the fence does not hinder this, then fine, but the space it takes up should be minimised.
93	I prefer the area to be a green and natural space of indigenous plants with a simple path and a few seats for passive enjoyment of a revegetated ecological sensitive part of the habitat link along the Diamond Creek.
94	See above comment - focus on revegetation. There is a huge park adjacent already
95	Why are we denying our historical side? Pioneers of Eltham should be valued. They planted European trees of which some are now significant. Why are they being denied any recognition? Keep significant trees of all types. Replacements will take 100 years. Loss of oxygen & habitat is significant already by loss of trees to date. Eltham is diverse. Whilst appreciating indigenous -it's a lot more maybe entrance to Eltham should display artistic creative side and a welcome.
96	Happy with the idea to remove and replace pine trees
99	Yes the pines should be removed and fantastic if the timber can be reused locally, however this area should be used for fauna and biodiversity rather than a focus on 'human activity' features.
100	Resusing what has been removed is a great idea.
101	All of these items are valid but are in the wrong area. Move them to B
102	Unsure if balance beams are safe as per see saws?
105	The biggest issue from a garden/wildlife perspective in Eltham that remains unchecked, and is becoming a bigger issue with every passing day is the skyrocketing population of Noisy Miners. Tall trees with wide expanses of cleared bush habitat in between provide them with their ideal habitat, particularly when mixed in with peoples love of nectar producing plants such as Grevilleas and Callistemons. I have watched them drive away our existing local population of Rosellas, Pardalotes and Thornbills, to the point that the only bird left in our yard is the Noisy Miner. Populations of Noisy Miners and other birds remain at a balanced level in any bush setting where the bush remains uncleared. My #natureinnillumbik posts in Instagram show what we have, and what we are slowly losing.
106	Am happy these trees are being removed. Its not a great spot for a play park.
108	This is a ridiculous survey designed for positive responses only - which I cannot give. You appear to have been taking instruction from Sir Humphrey Appleby (BBC).
110	I don't believe you need the fence along Main Rd. I like the path to be open, But you do need a wire fence around the drain.
116	I'm inclined to think this should be more about nature than humans
119	I think Area A should be strictly for passive uses with the focus on regeneration/revegetation - there are plenty of play possibilities in Eltham Lower park. Certainly use the timber for the boardwalks and store for later repurposing for art works or protective fencing along the drain and Diamond Creek
120	I object to the criteria being used for tree removal throughout the project. Dead trees are important habitat and should only be removed if they cannot be made safe (ie prune them and leave the main stump with hollows for habitat). I object to this area being renovated for higher human use. It's value as habitat within the Eltham Gateway should be preserved and enhanced, rather than increasing infrastructure for humans. The nearby picnic area could instead be renovated to be more natural, with meeting circle, stepping logs and sculpture etc. I like the idea of re-use of timber from removed pine trees, but not for it to be used where proposed.
121	less tarmac and concrete is good - the major road project is a disaster - I think of this project every time Dan Andrews extends the "state of disaster" declaration to support public health

QUESTION 13

Response No./ Submitter	Area A proposes re-use of timber from the removed pine trees, recycled as a combination of log steppers, balance beams, tee pees and sculptured play items. Do you support the inclusion of these items in Area A as presented on the proposed conceptual master plan? These are all of the submitted, worded responses:
124	Leave some decaying timbver to rot down, providing specialised habitat
126	I would rather the pine trees not be removed
129	There is not a suitable place for this comment - so have used this section. We think the priority is to create a two lane bridge in both directions over the river. This is incredibly risky in fire season as people will be get stuck here and not be able to escape in the event of an emergency.
132	I like the idea of using as much of what is already there as possible

QUESTION 15

Two of the trees to be removed are large cypress pines. Would you support the repurposing of their large stumps in situ as legacy carvings, seats or other items? These are all of the submitted, worded responses:	
Response No./ Submitter	
55	Other (please specify): What are they? Pines or Cypress? I dont believe they are Cypress Pines, which are native trees.
81	Other (please specify): Please avoid kitschy carvings / sculptures. Seats might be okay, maybe.
83	Other (please specify): all of the above - utilise as much on-site as possible
105	Other (please specify): Mulch, and replace them with She-oaks (Casuarinas) to attract a greater diversity of Australian wildlife.

Question Number	
QUESTION 16	
Response No. Any comments on Area B? These are all of the submitted, worded responses:	
1	The map image provided is too low-resolution to make out any of the labels, so I can't comment, but as with the rest of this, please focus more on revegetation with native plants, and less on making it a landscaped area.
4	Revegetation of indigenous plants is of paramount importance. Again the plan is too contrived and doesn't allow for natural habitat.
6	Why isn't the florist tent apart of the design? Money is going to be spent on the Gateway to Eltham but you will have an old tent as the focus . it doesn't make sense.
8	As much planting of indigenous canopy trees and shrubs as possible. Low maintenance. A natural treed entry to Nillumbik.
9	I think it should include more indigenous planting of all levels.
11	It doesn't matter what the trees are used for but so important to include them in the design and construction. There is a Carver in Eltham on the main road. Has some nice carvings
12	Leave as is
13	This is not a proposal you have decided already
14	Could the stone car park where the florist stall sits be made of a better surface
15	Area B should have some significant multi-layered revegetation and tree choice should reflect the flood plain.
16	This seems like a good proposal and will improve the area around the florist - a local landmark :)
17	I think the area could be better "enclosed" with tree planting along the western border including at he back of the Flower Seller area. Does the business require access from the back when they have access to a circular driveway in the front?
18	I think the use of rocks is unwise and would prefer the planting of shrubs, plants and grasses.
20	I'm not sure why that area has to be kept for the florist. While that use to be the ugliest section of the gateway, it is so sad that now that is actually the first bit of greenery that we see.... So devastatingly sad. So why not green up that car park area and plant a lot more trees and create a garden ... a real green gateway.
21	I would like to see an avenue of trees along the side of the road. Gums with white trunks featured, with gums behind having darker trunks - this was a suggestion at the pop - up information session & sounds attractive.
23	Please plant trees to replace those taken during the construction project
24	The proposed wood carvings are rather small and suited to pedestrians which this area is not conducive to. Pedestrians are moire prominent on the other side of the Main Rd as they walk, run and ride to the river. Efforts should be put into a substantial large sculpture rather than a scattering of smaller ones.
26	Support for plan
28	There's no mention that there will be any prioritisation of habitats for native species. I love that indigenous planting is being included to attract native fauna, and it would be good for tree hollows and nesting boxes to be included in the design.

Question Number	
QUESTION 16	
Response No. Any comments on Area B? These are all of the submitted, worded responses:	
29	Great idea: plantings to screen house
34	Florist is well known landmark as entering Eltham. Would like it maintained and blended with safe access
37	Structured colour and texture in the indigenous plantings with large rock boulders placed in a natural way.
38	If there needs to be any active elements or a structured meeting space and indigenous/ edible gardens within this precinct these could be on a smaller scale within Area B. I consider the small section of land on the corner of Main Road and Falkiner Street could have dense multilevel indigenous planting to help screen the open gravel surfaced area used part time by the florist. Additional planting could be introduced into this leased area, with agreement of the tenant/florist, which I would imagine would also improve the immediate appearance of their operations.
40	I'm concerned any removal of dead trees may remove or severely reduce nesting /breeding opportunities for birds/ mammals provided by the hollows in the trees. In the event that none of the dead trees can be retained for this purpose (of breeding sites) I would like assurances that suitable and sufficient nesting /breeding boxes will be provided so there is not a detrimental impact on our wildlife.
42	Do not remove trees. Relocate them or plant new. Do not include any fence in any area A, B or C. Please plant trees to have a huge canopy for future generations . Start now.
43	Only if the trees actually MUST be removed
45	A shed like structure sympathetic to the new works would be great. Opportunity for two tenants. e.g Coffee Van and Florist.
47	This area should also be re-vegetated with indigenous plants of canopy trees and bushes.
49	Until the house and the boring car park and temporary florist tent are removed from the Gateway it wont improve
52	Why does the flowers space trump all other considerations? If like to see some of that ugly, unkempt and barren space returned to greenery. When the flower sellers permit is up surely the space the use can be reduced. They don't need that entire wedge. I don't want to kick them out, but they seem to be given undue weight in terms of what they want ( I.e. more ugly space than they need).
54	have you considered fire resistant species for the future
56	would like to see more white trunk native trees , more avenue trees and indigenous plants along here.
59	It would be great to have seating, gardens and maybe mobile food trucks to compliment the florist
62	Great to see more trees and bush around that naked area
63	Area B has plenty of area to incorporate area A's design into it and leave Area A for a natural corridor. Human intervention in Nature is not necessary please leave some area for the birds and animals. People will complain of snakes near the river - it is their & the lizards & frogs home and needs to be revitalised but in a sensitive environmental manner and kept as wild indigenous not structured
65	Would like seating added here too

Question Number	
QUESTION 16	
Response No. Any comments on Area B? These are all of the submitted, worded responses:	
66	Don't chop anymore trees down. The trees removed for the massive over the top intersection have not been replaced, where are the replacements ?, Mildura ?..?
67	Again I am unsure why this area cannot be used for just planting a very natural bush landscape - something we all want as the gateway to Eltham.
74	Please no grass on Area B. Prefer Just full plant out with indigenous planting lease. If it's absolutely insisted to be grass- please make all native grass. The whole feeling of Eltham is about coming home to bush. That's why we are different to the rest of suburbia.
77	Why does everything this Council plans have to have an Indigenous stamp on it - Cr Duffy at large here clearly. This area was not an important Indigenous gathering/ meeting area - that focus should be directed more at the confluence of the Diamond Creek and Yarra River at Lenister Farm where the sculpture 'Not just a pretty place' is situated. Besides, Main Road is busy and noisy with car traffic which would make it unpleasant and clearly MRPV has design intentions to rip the heart out of the gateway with a 4 lane divided road right up through the Avenue of Honour. Why else would they build a ridiculous 11 lane wide intersection that funnels directly into a 2 lane road in one direction and 4 lanes the other. Anything done in Areas B and C will be temporary.
78	Area B "not" including trader should be presented for consideration. Alternatively include multiple traders or as a potential location for art installation.
80	I am happy with the plan for Area B, with more tree plantings and use of rocks/beams.
81	Can't read the small print on this. Hope it includes some upgrading of indigenous Nillumbik planting in this area.
84	I strongly support indigenous plants being included in Area B.
86	As much large, medium and low level native planting as is possible in this area.
89	I like this plan but needs to include Indigenous shrubs and edible Indigenous garden.
91	Consulting Area B Plan cost me my previous comments... so frustrating the process needs revision. Area B (as I am not able to consult the plan in mid survey) should contain. at least, a few more canopy trees, if the flower stall needs to be retained. Again, we are trying to design a GATEWAY, which demands a presence from Main and the tracks.
92	Fine
93	My prefer this site to be landscaped with trees and bushes leaving the flower seller's lease site as it is.
94	No, as long as there is plenty of vegetation, and not too much grass - we already have plenty of that nearby.
96	Would love to see this come to life- filling the space in with plants rather than lawn sounds like a great plan to me
98	Landscape this with natives
99	This area is better suited for 'human activity' features such as some of those proposed for area A.
100	Very happy with the number of trees being planted and I think the rocks will look great.

Question Number	
QUESTION 16	
Response No. Any comments on Area B? These are all of the submitted, worded responses:	
102	Area B should be landscaped with safe designated parking if still used for floristry sales
103	The more plants the better.
104	A 4G or 5G cell tower would be fantastic in this location. Reception here is terrible and as residents on Souther St, Eltham this impacts us everyday. We would love to share the beautiful landscapes and indigenous aspects of this gateway and having fast internet and phone reception will make this space more appealing.
105	As with A.
106	Am very happy for the florist to be there and the site needs indigenous revegetation as an improvement for the gateway to Eltham. The new intersection is so ugly and badly designed that we need an inspirational avenue and entry to Eltham at this site.
108	Leave all the trees as they are. Too much damage has been done already.
109	Planting is not enough. We need a visible sculpture on the north side of Main Rd in the triangle at the corner of Falkiner St that speaks to or symbolises what Eltham represents. The existing stump denoted as a black spot in "B North" appears to be a coolamon carved tree and if confirmed I would object strongly "in a possible sculpture being made from it". I would expect that Wurundjeri people have input to this whole project. I would suggest that this carved tree should be recognised and become the basis for the design of all items intended to compliment the natural environment. Concentric circles are indigenous symbols meaning a place to settle, a camping place. I envisage a rusty iron sculpture of concentric rings symbolising life here over the ages to the present meaning a welcoming family oriented community. The elevated grassed area in "B North" could then become a garden of tree sculptures in a part circle illustrating the history of Eltham with space for future additions. In that way the gateway becomes a living entity.
110	I am so pleased that you are working with Vicki Ward and MRPV on this project. Vicki was talking about this idea from the beginning of the Roundabout project. Whilst community groups were still debating the design of the intersection she was trying to garner support for this idea. It is terrific that Nillumbik have got onboard to make this happen.
117	More native trees to be planted
120	I object to the criteria being used for tree removal throughout the project. Dead trees are important habitat and should only be removed if they cannot be made safe (ie prune them and leave the main stump with hollows for habitat).
121	less tarmac and concrete is good - the major road project is a disaster - I think of this project every time Dan Andrews extends the "state of disaster" declaration to support public health orders
124	Perhaps go for seasonal colour in species.
126	It would be preferable to re-work the bus stop so that a stopped bus doesn't block one of the two lanes. Also some nice deciduous trees would be preferred over eucalyptus.
127	Looks good to me
128	I'm pleased the long standing Florist is being allowed to continue trading from the same place
130	I would need to see a detailed landscaping plan to comment

Question  
Number

QUESTION 16

Response No.   **Any comments on Area B? These are all of the submitted, worded responses:**

132

This is obviously a secondary area due, in part, to the lease to florist & associated parking. I do feel this does not lend itself to the best design for the area - causes fractured planting visibly & physically & will look out of place in thie premium area as a gateway into Eltham. I have long wondered how this lease occurs & why it has been allowed to exist for so long, how much they pay, how they get their electricity etc. I also feel that their need to make a living should not be held above the plans a council has in a chance of a generation to achieve the look we want for Eltham for the next 10 years or so. Difficult to bring it into the plan at a later date. Additionally I think the allocation of parking space if way too generous! There are usually only a couple of cars in the area at most times. This lease size, if it must be honoured, needs to be justified on more grounds than the fact it assists their business! Is the amount they pay for the lease commensurate with a parking area more typical of medium sized business? If not, then they either need to pay the going rate or the number of places needs to be renegotiated. So ideally I would like to see a continuation of the planting in this area to include the floris/carpark area, perhaps with a small scale commercial lease area for a coffee cart, food van or similar.

Question Number	
QUESTION 17	
Response No.	Any comments on Area C? These are all of the submitted, worded responses:
1	Same as for Area B.
3	This looks like a very good site for proposed artwork
4	Revegetation of indigenous plants is of paramount importance. Again the plan is too contrived and doesn't allow for natural habitat.
5	I am very keen on a sizeable sculpture, but it must be beautiful. I would really like for the public to be able to vote on possible designs. Please consider local metal sculptor Tim Read. I think it is should reflect something typically Eltham, maybe the copper butterfly...
6	Unfortunately there is no wow factor with the conceptual drawings and the area will look very similar to what is already there. The money needs to be spent on the bridge going over the Diamond Creek. This bridge should be the focal point to Eltham's Gateway.
8	As much planting of indigenous canopy trees and shrubs as possible. Low maintenance. A natural gateway to Eltham/Nilumbik.
11	Aboriginal art here please near the entrance with the Acknowledgement to land. Would be great to have the Local Aboriginee commissioned to create a piece for the entrance
12	Leave as is
13	Great place for graffiti
15	Area C is of major visual interest. It should have plantings to restore the presence of large eucalypts over the coming decades. It also has scope for visibly flowering understorey vegetation.
16	This area also seems fine, however if there is to a future sculpture I would argue that it needs to be a high quality commission and sympathetic to the surrounds. Eltham and Nilumbik has a proud and rich artistic culture and yet rarely does this translate well to the public art around the shire, particularly Eltham.
17	I think the plans for a sculpture in this area are excellent; it may also be possible to have a reference to the sculpture on the other side of the road. The sculpture should only be lit by unobtrusive lighting if at all.
18	I really like the use of “White Trunk Trees” as part of “The Gateway” and the inclusion of a “Major Piece of Art”
20	You guessed it..... more TREES!
21	As for area B, would be good to have a leafy green gateway to Eltham after that bare intersection. I applaud the idea of the Eltham Gateway project & appreciated the opportunity to speak with people at the pop - up session in front of Eltham Lower Park on the Sunday morning - it was very helpful.
23	Please plant trees to replace this taken during the construction project. I'd rather retain the gum forest feel of entering Eltham rather than including a feature sculpture. If the latter goes ahead I would appreciate consultation of the actual sculpture to be erected.
24	It's unclear from this plan where this is located.
26	The art work selected should not only be a decision for art experts. Too many times artwork selected for the public is judged as quality art but is not considered enjoyable by the public. Please show the public of Eltham the options and take note of their choice.
28	It's not clear where area C is located. I'd like to echo the need to incorporate nesting hollows, boxes and insect hotels within this space.

Question Number	
QUESTION 17	
Response No. Any comments on Area C? These are all of the submitted, worded responses:	
29	I like the idea of a sculpture here
37	Structured colour and texture in the indigenous plantings with large rock boulders placed in a natural way to be viewed from the car driving past.
38	Area C may be the appropriate area for a sculpture and/or a structured meeting space and indigenous/ edible gardens, with pathway access. I encourage Council to have a detailed access evaluation undertaken of this total project, by an independent accredited access consultant, to ensure access opportunities are maximised for all users, including people with disabilities.
40	I'm concerned any removal of dead trees may remove or severely reduce nesting /breeding opportunities for birds/ mammals provided by the hollows in the trees. In the event that none of the dead trees can be retained for this purpose (of breeding sites) I would like assurances that suitable and sufficient nesting /breeding boxes will be provided so there is not a detrimental impact on our wildlife.
41	The art sculpture should be one that that says welcome to people and is the Eltham style
42	Plant trees and native vegetation and leave it as much as possible to appear a bush which is the original landscape of the area. This will be really a contribution and the real acknowledgment for Wurundjery people who would not be cutting trees to include a playground or a path.
45	An art sculpture that is natural in material use yet contemporary in form. We've seen enough carvings of birds and koalas to last a lifetime. Think JB Blunk, Mono-Ha – be more ambitious.
47	This is the most appropriate area to include some artwork with a theme influenced by Aboriginal history/culture, also potentially using the wood from the lopped cypress pines, and more seating.
49	Until the house and the boring car park and temporary florist tent are removed from the Gateway it wont improve
54	have you considered fire resistant species for the future
56	I would like to see a sculpture using large basalt rock / timber and steel. more Eltham like
59	native gardens to compliment the sculpture
62	Love moving the fire warning sign and putting art there
63	This are could have low growing grasses that attract insect and birds beneath the Art sculpture
65	Would like seating added here too
66	Retain all the vegetation and add more trees to replace the destruction of the original gateway
67	Indigenous artwork is a good idea here together with signage honouring our indigenous heritage
69	Prefer bush trees than sculpture Again putting man first Let's put trees and fauna first Animals can't reside in sculpture

Question Number	
QUESTION 17	
Response No. Any comments on Area C? These are all of the submitted, worded responses:	
74	Art sculpture to be large and some sort of rushed metal. An additional wooden piece by Leigh would also be nice.
77	As per Area B
78	If Area C is the favoured site for a major art installation, it should be a civil/civic collaboration, not the vision of an individual artist. A good example of such is 'Seeds Of Change' <a href="https://www.wyndham.vic.gov.au/venues/seeds-change-2004-designerthompson-berrill-landscape-architects">https://www.wyndham.vic.gov.au/venues/seeds-change-2004-designerthompson-berrill-landscape-architects</a>
80	I am relatively happy with the plan of Area C, with more tree plantings and a simple sculpture.
81	Hope you get some good designs for the proposed art sculpture
84	I would strongly encourage an indigenous public artwork that can educate the community and make the entrance to Eltham welcoming for First Nations peoples.
86	Area C also requires far more planting.
88	Why would a Piece of Art (I assume meant to be looked at) be positioned at a point in the road where traffic is merging? This is point where attention should be on the road environment not the surroundings.
89	Impossible to read. Too boring and empty. Flower Stall should remain. It is very popular with locals and travellers
91	Any sculpture needs a Wurundjeri theme... but I would like to respectfully explore with the Wurundjeri, if they would feel comfortable with a First-nations theme, in conjunction with a 'European' theme... a Culture Mix???
92	Fine
93	My suggestion for this site is to have subtle artwork including recognition local indigenous history/culture and indigenous flora & fauna.
94	No, as long as there is plenty of vegetation.
96	This would also be a lovely area to put some low-lying vegetation if plausible
98	Aboriginal art area, include native plants
99	This area is better suited for 'human activity' features such as some of those proposed for area A.
103	The more plants the better.
104	Again a 4G or 5G tower to increase signal strength here would be fantastic as local residents on this street. Thank you for all your efforts with this masterplan, it looks amazing so far.
105	As with A.

Question Number	
QUESTION 17	
Response No.	Any comments on Area C? These are all of the submitted, worded responses:
106	We don't need an art sculpture here - I would prefer a manna gum please. There is such a huge footprint on the environment here with the road and existing footpaths - less is more.
108	Plant trees.
117	More native trees to be planted
119	I like the use of “white trunk” trees to create the visual effect of a gateway.
120	I object to the criteria being used for tree removal throughout the project. Dead trees are important habitat and should only be removed if they cannot be made safe (ie prune them and leave the main stump with hollows for habitat).
121	lless tarmac and concrete is good - the major road project is a disaster - I think of this project every time Dan Andrews extends the "state of disaster" declaration to support public health orders
124	Timeless' and accessible sculpture, and one that acknowledges the massive change posed by changing climate. Nods to younger children.
127	Looks good to me
130	I would need to see a detailed landscaping plan to comment
132	Area C seems to be more typical of other road-side plantings by necessity. I think a prominent art work visible on entering Eltham would be good - to set the tone. I would like to see something reference sustainability/upcycling/repurposing...maybe something linking to Montsalvat heritage with large timbers/metal...could be made with items from Montsalvat or Matcham Skipper's old place?
66	

**Submission #1**

CC: Southern Gateway Renewal Group

This master plan does not deliver a bushy or natural gateway; it is too manicured and encourages activity on a sensitive riparian zone (Site A).

Please listen to community sentiment and focus on indigenous planting and enhancing passive bushland. This will save you money and support the local wildlife / health of the creek.

It is unlikely drivers will stop to engage in the space and therefore the focus should be more on the overall feel of the gateway as drivers pass through. We want to know we've come home and this means more trees, less infrastructure.

Regards

Submission #2

RE: Southern Gateway Renewal Group

I echo the sentiments of many people in Eltham, who believe the area is gradually losing its unique bush feel. This gateway project is an opportunity to regenerate the landscape and give people a reason to sigh with relief as they enter Nillumbik.

Looking over this proposed master plan, it's clear that Site A is overdeveloped and does not deliver a natural gateway. It also proposes too much activity on a sensitive riparian zone critical to local wildlife.

I would rather see a focus on indigenous planting and passive bushland. This will lead to a smaller budget required and more positive community feedback.

More vegetation, less infrastructure.

Regards

A solid black rectangular box used to redact the signature of the sender.

**Submission #3**

RE: Southern Gateway Renewal Project

This gateway project is an opportunity to turn a new leaf for Nillumbik. The Community sees this as an opportunity to reconnect with what has historically been a key part of Eltham's identity - the natural environment.

Let's not overcomplicate things. The new gateway needs to retain as much existing canopy as possible - notably what is indigenous to the area - and focus on new planting and informal bushscape. We won't want to pull over as we're driving into town and walk around in circles.

Site A is a sensitive riparian zone and needs protecting. Invest the budget on revegetation and creek restoration, not activity zones inappropriate for the site. If people want to play and congregate, they can do so in the generous space provided by Eltham Lower Park.

I do hope Council seizes the opportunity to restore what people love about the area.

Regards

Submission #4

**ELTHAM GATEWAY PROPOSAL**

Submission from [REDACTED] 29 July 2022.

A single issue at this stage. The plan must be highly fire aware with plantings, given this is one of few late escape routes for fire evacuation from Eltham.

No large trees near the roadway which could be blown across the road. No highly flammable lower storey plantings which if burning adjacent to the carriageway, would present a high radiant load to passing traffic.

Unfortunately, the concept plan couldn't be 'blown up' sufficiently on my computer screen to discern detail of plantings proposed.

Submission #5

[REDACTED]  
[REDACTED]

We have reviewed the proposal for improvements in the area and are mostly OK with what has been proposed.

Just one item concerns us – the placement of rocks [REDACTED] to “remove (the) ability to drive through here...”.

This tract of land is occasionally used by various utility and council vehicles to access the park and utilities mains (gas) for maintenance and other purposes, often unloading their equipment at the flower seller’s lot, as well as the tractor which cuts the grass in the park. We are concerned that these vehicles would need to use [REDACTED] driveway entrance from the Main Road, which is precarious at times with all lanes merging to a single land at that point or, worse, driving along the bitumen footpath.

There are also several Telstra pits [REDACTED] which require maintenance from time to time. The rock placement appears to be directly on these pits.

I would also feel safer if vehicle access through this area was possible in the event of an emergency [REDACTED]

Whilst this track was abused on many occasions during the works at the roundabout by cars seeking to avoid the traffic delays, I can confirm that it is mostly used in a respectful manner.

Your consideration of this matter is appreciated.

Respectfully yours,

[REDACTED]  
[REDACTED]  
[REDACTED]

[REDACTED]  
[REDACTED]

Submission #6

31 July 2022

To whom it may concern,

Below is my feedback concerning the new Gateway entrance into Eltham:

The community voiced through a survey that they would like Site A to be a green and a natural space of indigenous plants with a simple path and a few seats for passive enjoyment of a revegetated ecological sensitive part of the habitat link along the Diamond Creek.

The concept design for site A looks to be much more structured than the community was looking for, reducing the environmental benefits of the habitat link close to the Diamond Creek. I envisaged a much more peaceful space that would be for quiet contemplation rather than an area encouraging larger gatherings, and likely displacing the animals that currently inhabit the area. It reminds me more of a nature playground, that kids will be riding bikes through. I would prefer to see the area less developed, and a place for quieter activities such as a stroll or bird watching. Any dead or dying trees that are deemed safe should remain in the area as a home for local wildlife.

I would be happy to see edible indigenous plants in Area A, but I would like to see them in a much more unstructured way...not with an expensive spiral garden. Small signs to educate about the plants would be great, but a structured Wurundjeri garden isn't what I would be looking for in Area A.

I would be happy to see a fence that separates the bike path from Area A, however, the proposed fence looks to be extremely costly. I would be happy to see the pine trees that are to be removed, used in the fence or seating in Area A. I don't believe log steppers/balance beams are necessary in Area A, as there are multiple playgrounds very close to this natural space.

I don't believe this space needs a meeting circle, with a quieter natural space preferred.

I like the plans for both Area B and Area C.

Yours sincerely,

**Response to Eltham Gateway Project - Draft Conceptual Master Plan.**

The philosophy determining the approach to the three areas designated as the Southern Gateway Renewal Project is to create a sense of the entrance to Eltham as being the beginning of the Green Wedge. The essential parts of this are to replace the large numbers of canopy trees lost and to restore the continuous habitat link along the Diamond Creek corridor.

Both of these objectives are best met by the use of indigenous plantings.

It appears from the proposed design that the results of the survey (conducted by Vicky Ward MP) were not adequately conveyed to the designers within the Council brief. Almost 80% of the 370 respondents indicated their preference for a natural revegetated Area A with minimal intrusive elements. There was no mention of formalised meeting circles, indigenous edible garden, formal looped spiral paths, fencing or stone seating.

Area B should also be revegetated with indigenous plants of canopy trees and bushes; leaving the flower seller's lease site as it is.

Area C is the most appropriate to include some artwork with a theme influenced by Aboriginal history/culture, also potentially using the wood from the lopped cypress pines, and more seating.

**Overall Costs & Maintenance**

The project is to be one of low maintenance and low cost. The current proposal does not meet these criteria. The proposed landscaping appears to be costly; mowing between paths, fence posts, rocks and logs would be difficult and time consuming. So too would be constantly checking the deterioration of logs on the ground and stability of rocks.

Further, a simple walking pathway towards simple spaced seating areas would suffice.

The overall design as proposed is too artificial and contrived.

**█ respectfully suggests that the existing proposed design be amended to more closely reflect the wishes of the community.**

---

## TREES

The character of Eltham is bound to the presence of mature, indigenous trees, a diverse understorey, and all life they sustain.

Any proposed gateway must be protective of all the indigenous plants.

The two-lane bridge must be protected and maintained as a two-lane bridge with its wonderful qualities; the bridge and the curving road that follows were carefully designed with the particular purpose of bringing about a change of pace, a slowing, calming entry into Eltham.

The new gateway should be respectful and humble. It should embody the conservation qualities that residents value most – those that are also tied to Nillumbik being a Conservation Shire.

Rather than create yet another structure imposing itself upon the landscape, a clever design will simply revegetate the areas that have been disturbed and/or neglected for too long, creating dynamic shape, contrast, flow, movement, colour, and more, through the natural qualities of indigenous vegetation – from diverse groundcovers to tall trees.

It is unreasonable to dig the earth, build structures, bring in resources from other places (destroying those places as well, and also going against Nillumbik's Climate Emergency Declaration), when we can powerfully celebrate what is naturally occurring here, and which brings life and vitality to the area, creating health benefits for all.

### CONCERNS REGARDING COUNCIL'S ONLINE SURVEY

The first question in the online survey asks, 'In a few words what do you like most about the Eltham Gateway conceptual master plan?'

This makes the assumption that a person filling out the survey actually likes at least one aspect of it. It is a leading question, and not great for receiving clear feedback from a community. It limits possible outcomes by offering prescriptive/pre-defined options.

The same approach is applied to the second question asking people to rank in order of preference, 'Within Area A, which parts of the conceptual master plan appeal to you the most for you/your family?'

The list provided does not include natural bush/revegetation. We need an option that is respectful of THIS place, and the particular ecosystems/biodiversity.

### COMMUNITY VOICE – THE TREES SPEAK CLEARLY

When the Eltham Roundabout/Fitzsimons lane roadworks were carried out, the community suffered a great loss. The distress was palpable within our community, and we were interested in enabling ways for people to express their feelings. We created the opportunity for people to drop letters off to various locations around Eltham. We received hundreds, and they were ALL dominated by the same sentiment: it is the TREES that we love, that create this place called home, that nourish our hearts, minds, friends, families, and the bustle of life in birds, insects, frogs, possums and so much more.

Here are some examples of the many hundreds of letters received. These clearly describe the desire for trees and other indigenous vegetation to be the focus of the gateway:

my husband & I are devastated  
by the destruction of the  
trees at the Eltham Gateway

February 2021

Whilst a community has lost a significant portion of its soul, the Eltham trees destruction at a gateway roundabout, will continue to teach us, shelter us and communicate to us, the residents.

The trees remaining, are talking and sharing with each other. As neighbours we can continue to follow their example. And the stories we need to tell, and keep telling, will eventually be heard. Only when we stop will the message die. And this will never happen!

Sincerely

THIRD GENERATION IN THE LOCAL AREA.  
AND TRULY SADDENED AND DISGUSTED  
AT THE WAY IN WHICH THE DESTRUCTION  
OF OUR AREA HAS HAPPENED.  
WHY? WHAT FOR?

### Trees and Roundabout

From the top of the hill, there you were  
to welcome me home  
back from work  
or the bustle of life to the south.  
You told me to breathe, here was Eltham again at last.  
Round to the right and there'll be the bridge and the wattles.  
Aah.  
Your lights were never red for more than a moment  
the flow of cars smooth  
each taking its turn.  
Your leaves and your trunks they waved me around  
symbol of green  
symbol of quiet  
of strength  
and cool clean air.  
You were my friends  
and I miss you.  
This photo I will treasure  
I so mourn your passing.

19-02-2021

19/2/21

What a disgrace!

Behind the residents backs; on a day in lockdown, our wonderful entrance to Eltham is defaced.

The trees taken down on the roundabout in this manner saddened us here in our suburb of Eltham. It is a regular sign of the times we are living in, that commerce creates a world less wonderful, less clean and less life supporting.

When are we going to change?

When it is too late?

Where is true leadership?

From a resident, a mother, a woman who cares

To those responsible for the destruction of the roundabouts & the loss of so many trees,

Surely traffic flow improvement could have been achieved with less impact - we know this was possible from the alternative plans which were put to MRPV.

The impact is devastating for those who have seen this destruction, for the birds & other creatures whose homes have been lost, & for the character of Eltham's gateway. This has had a devastating impact on the community, not just of Eltham, but of so many who use this road. People are outraged, heartbroken, & grieving. We won't forget

One woman who was too distressed to  
put pen to paper has decided to leave  
Eltham after decades, living most of her  
life here

I recently discovered the  
devastation of the loss of  
trees at the gateway to  
Eltham.

I was extremely distressed and  
saddened at how what looks  
like a massacre of our previous  
green entrance.

I was shaken and brought to  
tears as I thought of the loss  
of trees and the impact to  
the birds and wildlife.  
The very reason I live here is  
because of the beautiful  
trees and the impact they have  
on our health and our daily  
lives.

What can we do to stop the  
further destruction of the  
area that has been home  
for a number of years.

I hope this letter may assist  
in a small way to help stop  
further destruction of this  
beautiful area.

*I felt saddened & devastated as I drove towards our beloved roundabout on my way to work on Monday, 15th Feb 2021. The violent destruction of mature trees that have probably been home to birds, insects etc & sheltered us from the sun & of course welcomed myself & fellow residents home from work at the end of the day or any journey. When I have been to the city or other concrete destination, for example, like Footscray. When I see our special green gateway, our special roundabout with the cockatoos racing around the roundabout & among the trees, I felt refreshed & relieved to be back among the trees. But now all that life giving beauty has gone. I was dreading it as I neared the roundabout. I was shocked by the devastation, caused in a few hours to the green gateway. No more will I feel refreshed, relieved, & of course entertained by the cockatoos as I reach, home. I will be met by traffic lights & concrete. There will be no welcoming shade from the trees. It became a sterile, lifeless place in a matter of hours. That special place will be just a monstrous intersection like any other in Melbourne. All I have is memories. I mourn the loss of this beautiful place. I now dread that empty, lifeless place. It has also made me feel disillusioned by the illusion of democracy.* ■

---

What can I do? Am so upset at the destruction of trees at roundabout. Heartbroken. Can we do anything to stop the further destruction of the lovely trees. Am now think of leaving Eltham after many years as this is just too much to endure. Thankyou for giving me the chance to have a say. Broken hearted. ■

---

*It is very difficult to see how removal of the trees is defined as "essential work". While thousands of children suffered through further disruption to the new school year, many people's workplaces where shut, all of a sudden this work was urgent enough to carry out during a stage 4 lockdown? And risk the possibility of spreading COVID by the workers as there was little social distancing. (if the risk was high enough to shut down a city, it was high enough to defer non urgent works like this). Or was it specifically timed given the protest HAD to be cancelled on the Saturday and the council saw this as an opportunity to go ahead with cutting the trees before a protest could be held and further attention brought to this issue? Was this even within the rules of stage 4 lockdown? Surely this isn't classified as 'urgent' roadworks?* ■

---

I'm scared to go to the roundabout and witness the scene of this sheer and unwarranted vandalism. I know this type of destruction is happening every minute somewhere across the globe. It's all awful. Do they realise the implications of this desecration? Probably not. ■

---

*Simply disgusting, but look our major parties don't care for the environment anymore and haven't for a long time. As a result i have voted informal Since 2014 in the lower house Federally and State. On climate change in Victoria we have a government that is putting in renewable solar and wind and now hydrogen but at the same time it is cutting down trees which store carbon. So therefore what is its policy on climate change? It does not have one. And offsets what a load of bullshit, Many animals are territorial do they think a Magpie can live in a new area? And besides the trees are seedlings, and due to our increasing hot days will they survive? And how much carbon do they have? This state is seeing neighbourhoods destroyed by the State Government's massive projects, and still we have traffic congestion. Some i agree with but most are just too big and unjustified. The excuse for this project is that it is unsafe, well once traffic builds up at Eastern End of Lower Park where the bridge over the Diamond Creek is where their will be two lanes will this be unsafe as well? More congestion and the answer is more roads. Warrandyte bridge thousands spent is still a bloody mess! To finish our members of parliament leave with good incomes and pensions we instead have to endure the mess and destruction of our living standards that they leave us. We don't get the pensions they get. Time their perks were reduced it has gone too far. The previous Labor member for the area cared so much for the suburb that he moved to the Macedon area. Will the current member do the same?* ■

---

Bloody destructive and sad. ■

---

*This is environmental vandalism! There has been no genuine consultation; only the push-polling of the MRPV preferred solution, based on out of date data used for modelling which they refuse to make available to the community. This mindless bureaucracy touts numbers of interactions with the quality of "consultation". Genuine consultation means reaching common ground on the issues followed by co-development of the solution with the community and experts. The bias is in the name. For them, a more modest solution won't do - it must be a major roads project to justify it as theirs.* ■

---

The roundabout is a dreadful project. So much money is being spent to destroy the very things that make Eltham and its environs special. It's a lovely gateway to the area with trees. It will look much more industrial - a loss of the very nature we need as COVID has demonstrated. Future generations will wonder why such vandalism was not only permitted but promoted. We will mourn the loss of those trees and the current amenity of the roundabout. ■

---

*Devastating to see the destruction of our beautiful Eltham Gateway. When I first came to Eltham nearly 20 years ago, I was so captivated by the beautiful trees at the entrance to our suburb, that I decided I wanted to come and live here. So we did. For the past 18 years, driving past all the trees at the round about has always been a source of joy. So very sad to see the trees demolished.* ■

**Submission for Eltham Gateway Project (due 11.59pm, 7 August 2022)**

I am a member of the Friends of Diamond Creek and the Friends of Edendale Farm, and have been actively involved in native vegetation regeneration projects for many years. I am also the convenor of a local climate group, Nillumbik Climate Action Team (NCAT). I have lived in Eltham for 33 years.

Along with other community members, I provided feedback to the initial community consultation phase of the Eltham Gateway Project (survey conducted by Vicki Ward in 2021). This feedback from the community mostly supported some landscaping, structured planting and artwork on Sites B and C, but the majority preference for Site A was to avoid excessive structured intervention (apart from some paths and perhaps unobtrusive seating) and instead to undertake the ecological restoration of this area to allow indigenous vegetation to flourish, after the weeds and dead trees had been removed.

In the current proposed plan, this has largely been ignored. A number of higher impact structures have now been proposed for this site, including an extensive pathway complex (looped pathway, spiral path), meeting circle, indigenous/edible garden, log steppers/balance logs, structured indigenous planting and steel/timber fencing.

In a time of climate crisis, it is essential that we use opportunities like these to protect the environment from damaging climate impacts. The latest State of the Environment report has revealed that the environment is in dire straits due to the combined effects of climate, bushfires, land clearing (including logging), and ineffective government regulation and protection.

The current project offers an opportunity to restore some of the damage done by earlier inappropriate planting, and years of neglect.

A resilient biodiverse ecosystem is the best bulwark against climate catastrophe. It is an opportunity to actively rehabilitate a degraded area in an environmentally sensitive, non-structured way, and by so doing encourage the return of some of the biodiversity that this part of Nillumbik once supported. The Diamond Creek is the main habitat link from the Yarra River to the Kinglake National Park. By regenerating the indigenous vegetation in this area and keeping human impact to a minimum, the movement of wildlife along the creek can be facilitated.

For the above reasons, I am strongly in favour of the focus for Site A being away from human-based activities, and squarely on ecological restoration and revegetation, to enhance biodiversity and mitigate against climate damage.

## Submission on “The Eltham Gateway Project”

The “Eltham Gateway Project” demonstrates exceptional collaboration between Major Road Projects Victoria, Vicki Ward MP, the Southern Gateway Renewal Group and Nillumbik Council, who now offer this “Conceptual Draft Plan” for community feedback. Thank you for this opportunity.

The Gateway Project offers a truly a great opportunity to give Eltham and Nillumbik a welcoming, renewed, green gateway and to affirm that Eltham and Nillumbik are indeed “leafy”. It will be our legacy for the generations to come.

We hope the Wurrundjeri elders been consulted about any historical and cultural significance of the sites of the “Gateway Areas” and about the design in general.

### GATEWAY PROJECT SITE A

In the community survey of 2021, the words “nature/natural”, “vegetation”, “plants/planting”, “indigenous vegetation”, “bushy/bushland” and “trees” frequently recurred in survey responses to describe what people wanted at Site A. These words reveal what the community felt was lost when trees were removed to make way for the new intersection at Fitzsimons Lane/Main Road.

At the moment Site A looks vegetated and bushy from a distance, but we are told that two thirds of the plants there are weeds including woody weeds, suckering elm trees, and dead, dying and hazardous conifers. The area is in need of restoration and planting.

The “Conceptual Draft Master Plan” shows a great many options for Site A. In fact it is very “busy” and does not have the simple plan and natural look that the survey results demand and we would prefer.

### Hard Landscaping on Site A

We are concerned that there are too many “hard landscaping” options which will prove very expensive and divert most of the budget away from the planting of trees and indigenous vegetation.

The area will look bare and hard landscaping will look prominent in the interval after the area is weeded and the old trees removed. So there is even more reason to keep it simple

and only include essential hard landscaping. Information signs using QR codes to link with “Progress on the Gateway Project” would be useful on Site A

- We query using so many basalt rocks and rock seating instead of wooden seats (with backs).
- We would prefer a looped gravel pathway, without a spiral, which should extend as far as possible towards the road bridge over the Diamond Creek before returning to the entrance near to Eltham Lower Park’s Main Road carpark. The path should keep well clear of the shared path along Main Road.
- The fence running parallel to the shared path along Main Road is unnecessary, and sends a message of “Keep Out” rather than “Welcome”.
- On the other hand, we recommend some fencing along the top of the banks of the Diamond Creek where they are hazardous: to protect the public from tumbling down, and also to protect the banks from erosion.
- Site A would be a good meeting place for small groups, with pairs of seats (with backs) angled towards each other – as shown at the top of the circular pathway on the plan. We believe that traffic noise would make it too noisy for larger groups to communicate so would discard the gathering space idea.
- One or two signs to help people identify the plants in Site A would make walks more enjoyable. Rather than individual signs next to each featured plant, use larger signs saying “Look out for: ...” with photographs of a number of plants that are on site, and a QR code to more information. How about using a miniature sketch of the artwork/sculpture as a logo for the “Gateway Renewal” on the signs?
- We suggest any stepping and balancing logs should be well away from the road. Too many logs and stumps make the space look cluttered.
- We support the use of board walks to allow for drainage of the boggy areas, especially near the rain garden (a welcome element). Board walks enhance amenity.
- We prefer seating with backs, and this was the preference shown in the survey.

#### **Planting on Site A**

- Prickly wattles like *Acacia genistifolia*, or *Acacia brownii* could be used to keep people away from Main Road and also to form barriers to the steep banks of the creek.
- There are many indigenous wattles which would make a colourful addition to the plant selection.
- We assume that sedges and other water-loving plants such as *Prostanthera lasiantha* would feature in the Rain Garden.
- We like the idea of the *Allocasuarina littoralis* forest – a nice reference to the conifers that were once on this site.
- Mixing edible food plants with other planting along the pathway will be more natural than having a designated “edible food garden”.
- The very general headings like “white trunked trees”, “black trunked trees” and “structured indigenous planting” make it very hard for us to provide feedback!

#### **GATEWAY PROJECT SITE B**

The survey results proposed there be less landscaping here than at Site A. The conceptual plan reflects this in the main, although trees could be planted parallel to Falkiner Street as a backdrop to the carpark and the flower seller's stall.

##### **Hard landscaping**

- The rocks close to the asphalt shared path parallel to Main Road at Site B South appear to be dangerously close to the path. Are they necessary?
- Could the embankment at B North be retained by a mix of rocks and cut logs from Site A?

#### **GATEWAY PROJECT SITE C NORTH**

This is an excellent site for a sculpture, providing that the CFA sign is removed to another location.

#### **ELTHAM LOWER PARK**

Nillumbik Council's Agenda (12 July) "Planning and Consultation" PCC.027/22 Concept Plan for Eltham Gateway Open Space referred to Eltham Lower Park in the following clause:

"In conjunction and aligned with this concept [ie the Eltham Gateway Project] Nillumbik has hazardous tree management and replanting work planned to be undertaken within Eltham Lower Park."

In December 2018 a number of conifers were removed from the "Council Managed Land" at the front of the park. The area has remained fallow since then. By now the pH balance of the soil, and issues with ground water draw-up should have settled in that area. [REDACTED] strongly recommend that it is revegetated as a priority in the next planting season. The community need to see Council's promise of replanting work in the park made real, especially since a further nine trees are to be removed from the front of the park "in conjunction with this concept."

[REDACTED]  
5 August 2022

Eltham Gateway Project Response

Initially I was just going to respond via the survey, but after attending one of the Pop-up information sessions I felt that more could be achieved by writing a submission.

To start by responding in a survey-styled format.....

Area A comments

To include a spiral path would make the area appear cluttered with too many paths and not enough plants. This could be a problem in regard to upkeep of the area. The log steppers and balance logs seem unnecessary and/or dangerous. There are already a number of play areas for children in the park. The proposed inclusion of teepees (indigenous American style?) and sculptured play items also seem to be an overabundance of structured child play areas rather than just letting children explore. The looped path, meeting circle, and seating are all positive ideas. Perhaps some of the legacy carvings could be a tribute to the "Pioneer Pines" that would be destroyed as part of this proposed development. These pines were planted in around 1910 when the government proclaimed the land as a public park at the request (in 1876) of the Eltham Shire Council.

Area B comments

What is not shown on the plans for this area is the vehicle "shortcut" from Falkiner Street through the florist parking area to Main Road. A drain culvert and bitumen driveway has been installed in Falkiner Street and, during peak traffic times, drivers will cut through the car park to exit onto Main Road near the bus stop rather than waiting at the Falkiner/Main Road intersection. This should be blocked at Falkiner Street for safety reasons, perhaps in the same style of rock work and planting in the rest of that area. The double tree stump that is marked as "existing stump, possible sculpture made from it" could be carved to pay tribute to the area pioneers and show an image of the Eltham Park Tea Rooms that used to be located in that area. A carving would be less likely to be vandalized than a timber sculpture.

To ramble on a bit more.....

My history in relation to the park goes back to the mid 60's when as a 7 year old I was taken by my parents to what was then classed as "the country" and went to the park to enjoy the miniature railway. I remember being so impressed by the silence when the train went under the pine trees that I later absconded from the care of my mother to seek out the trees. The branches in those days were close to the ground and I vividly remember crawling under those branches and into a magical world. I felt that, if I was quiet enough, magic would happen. So I sat, and I listened to the trees for awhile. Some years later, in 1981, I moved into my home in [REDACTED]. I am still in that home, and I still sit under the trees and wait for the magic to happen. I still listen. So, am I an ageing tree-hugging hippy? You betcha! A person who cares about wildlife? That also.

In 1927 "The Advertiser" newspaper described the park, including "the large pine trees growing there (giving) grateful shelter from the heat of the sun, besides adding greatly to the beauty of the surroundings." In the 1950's the park attracted 3,000 visitors for the Easter Gymkhana, dog competition and goat show. Imagine the relief of the contestants in the 1965 Miss Eltham Show Girl as they reached the shade of the pines after walking (in high heels) from Eltham township to the park for judging (hopefully not alongside the goats!).

Eltham has commemorated the losses in the 1914-18 war by planting over 100 non-indigenous trees in the heritage listed Avenue of Honour in Main Road. There were protests in 1944 over the removal of pine trees from Eltham Cemetery. The Shillingaw pencil pines still stand at their original site. The pines at Eltham Lower Park were planted at the turn of last century by Eltham pioneers.

Acknowledging and respecting the traditional owners of the land is essential – many councils are doing so. Could we be a little different, a little unique, and acknowledge the pioneers of the area as well? Perhaps establish a living history in some form? Could we also pay tribute to our pioneers by retaining some of the pioneer pines at the park?

The proposal talks of "rehabilitating and enhancing areas on both sides of Main Road.....and is a response to the construction of the new intersection at Fitzsimons Lane" Prior to the construction of the new intersection, I could see the roundabout trees from my bedroom window. I mourn their loss. It seems that the proposed plan is compensating for the loss of mature trees ..... by removing more mature trees. Yes, some of the pines are dead. It was stated that the rest are "at the end of their life". Enlightened communities revere old trees. These trees have heritage value, create habitat, provide nesting hollows, filter traffic noise and pollution and form a cooling gateway to our park and local area. What has also not been considered is that these pines are part of the aerial pathway for wildlife. Remove them and we run the risk of wildlife being killed by the large fox population in the area. The pines are also a source of food for native insectivores. Surely a good proportion of the pines can be retained, even to act as interim "nursemaid trees" for the small native saplings to be planted. You can't attach possum boxes to saplings, nor can wildlife use saplings as aerial pathways. Artificial aerial pathways, such as the one over Wattletree Road bridge, need to be provided if a significant number of trees are felled.

The proposal also talks of "revegetating underutilized roadside areas". The area described as "sub area A" is currently well populated with blackberries, wandering jew/spiderwort and periwinkle – especially near the imaginatively named Eltham Park Drain area. During a recent walk in Alistair Knox Park these same weeds are enjoying themselves in the nether regions of that park. A lack of maintenance is contributing to the scruffy appearance and underutilized roadside areas of the Gateway and our parks. Will the completed project be adequately maintained?

I imagine the future, if this proposal goes ahead in its entirety, would be something like this..... Instead of trains traveling under the silence of the pines with small voices saying "look, mummy, a bird" we could hear "look, mummy, half a possum". We will also need to change the sign at Pine Creek Station...perhaps to The Station Formally Known for Pines.

I also feel that, as I could also be considered to be near the end of my life, it would not be wise for me to open my door to some council members. Especially if they are toting chainsaws.

Thank you for the opportunity to comment on the Draft Conceptual Plan for the Gateway Project.

### Area A

The idea of a circular pathway is a good one but I envisage a slightly different circle. I believe the pathway should extend as far as possible towards the road bridge over the creek taking into consideration the precipitous nature of the creek bank on the approach to the bridge. This would enable walkers to wander through a pleasant, revegetated area before rejoining the bitumen footpath and making their way back towards the Eltham township. It would also allow those who had parked their cars to walk back along the footpath and gain a different view of the revegetation. There is already a similar much-used pathway in the park where people diverge from the bitumen footpath near the railway sheds and remerge near the Pony Club fence line having wandered through 300 metres of natural vegetation.

- I query the use of **too much hard landscaping** as the responses to the survey showed that people wanted the area to be kept as natural as possible.
- The basalt rocks are not in keeping with the area and do not fit with the requests from respondents for wooden seats with backs.
- The meeting circle with its carved stone seat seems to be a fairly expensive piece of hard landscaping and also, as mentioned above, does not provide seats with backs as requested by Eltham residents.
- The fence beside the bitumen footpath gives the appearance of fencing off the area and certainly does not give a welcoming feel. Given the request by respondents for a green, leafy approach to Eltham, prickly plants such as *Bursaria spinosa*, *Acacia verticillata*, *Acacia genistifolia* and *Acacia brownii* could be dotted about instead to provide a barrier along the bitumen footpath.
- The carved tree stumps could appear rather kitsch but the use of logs for steppers and balance would be great for children.
- Edible food plants with informative signage could be spread out along the pathway rather than in a spiral which seems rather contrived.

- The boardwalk leading to a rain garden is a lovely idea. I assume that sedges and other moisture-loving plants such as *Prostanthera lasianthos* would feature here.
- The idea of the *Allocasuarina littoralis* forest echoing the conifers which will mostly be removed, would create a pleasant area.
- But more information on the names of the plants to be used in the structured indigenous planting would be useful.

#### **Areas B and C**

- Names of the eucalypt species to be used in the white trunk planting and those to be used in black trunk planting would better enable the community to make informed comments.
- The current profusion of wattles coming into flower encourages me to make a plea for the inclusion of some of Nillumbik's many wattles in the planting scheme
- The flower seller's leased area appears to be just as bald and uninviting as it currently is. Would it not be possible to squeeze in a few trees along Falkiner Street while still allowing truck access? (Subject to leaseholder and Melbourne Water approval, of course.)

**Attachments:** [REDACTED]

---

*Dear Council,*

*I am a resident living [REDACTED] and would like to comment on the entrance to Eltham.*

*I am sorry I didn't reply to your survey but I was away and only read it on my return. I am quite concerned about the plans for the entrance. We live a few doors from the parking area behind Eltham Primary and have to contend with this every time we walk towards Eltham. I have witnessed three incidents, one involved a women who just missed being hit by a gum tree branch, another an elderly lady tripped up the concrete slab at the entrance to the school but managed to grab the gate – the edge of the concrete was covered by leaves which prevented her from seeing the ragged concrete. I now remove the leaves to make sure people can see it. Another problem is the huge gum tree that loses bark constantly.*

*I have removed this often because there is an elderly gentleman who has a mobile chair and he has great difficulty circumnavigating the debris from this giant of a tree. The car park itself needs work.*

*I am enclosing photographs taken today after the rain. People dropping their children off at school use this car park every day and again at night to pick up. The school is also used for other occasions by many people – an example is election time. Not a good look for our lovely community.*

*As you turn the corner into Eltham our curb appeal is appalling. The embankment behind the School is a perfect backdrop for a tiered garden with natives to attract our wonderful bird life.*

*A few autumn trees there for colour would look amazing. They need not be big and please, no more gum trees dropping their branches on the cars and visitors to the school. Gum trees are fine for large open spaces but definitely not a car park. I did complain recently about the footpath and gutters. The gutters are full of mud growing grass and the footpath could not be seen. The bridge curbs are a mess. I complained about the footpath and you responded, great.*

*A lovely man from your council has cleaned the path so that we can now actually see it, but in time it will go back to what it was because nothing has been done to stop the mud. The area needs topdressing with something sensible. You are going to spend a lot of money on the entrance to Eltham which will be admired by many I am sure, but how about doing something for the rate payers. We actually use these areas every day and we would like to see some action on this car parking area. It is a great asset to the school to relieve some of the congestion at the main entrances and also a bonus for the ratepayers who can use it for visitors coming to our area, as we seem to be getting quite a few units with limited car spacing. Many people walk their dogs on our wonderful walking tracks and many walk to the traffic lights near the school to cross the road, so this footpath is in daily use. Please consider this area when planning the improvements.*

*Yours sincerely,*

Submission #14

**Subject:** eltham Gateway restoration

Thank you for the chance to comment on this important matter.

We would like restoration of the 'bush', no built form except for some seating, and regular maintenance to collect rubbish and eliminate weeds.

Everyone felt the peace as they passed the lovely stand of white trunked eucalypts in the centre of the roundabout. Restoration of this cant be done, so planting of native trees where possible may help compensate for the loss we have felt.

**Subject:** Eltham gateway project (mobile reception consideration)

Hi [REDACTED]

My partner and I have submitted ideas for this proposed project and we love the plans thus far.

We live on [REDACTED] and are very supportive of a refresh of that area.

One consideration we're unsure where to best direct is about the very poor mobile reception. This extends along Souter, through the gateway project area and into Barak Bushlands. We speak specifically of 4G and 5G data access. Sitting in Barak Bushlands I am barely able to listen to my streamed audiobook let alone browse a website or catch up on footy highlights.

For such an affluent and populated area this is quite poor service provision. Perhaps a few years ago I would have said 'first world problem', but really this high speed access is becoming a bare minimum requirement. The nearest towers are a long way off. Down in Templestowe and up in Eltham town if I recall. Another behind the hill near the Bolton St shops creating a dead zone.

I wonder if as part of the works we can engage telcos to install a subtle tower for provision of this service to this very well used area?

Appreciate your consideration.

Regards

**Subject:** Eltham Gateway

To all,  
I was opposed to the removal of the roundabout, and the tree removal was disgusting.  
Both in execution and its timing that miraculously matched lockdowns, thus preventing opposition to the works.  
We need to keep Eltham's gateway as natural as possible.

Let us not forget that Vicki Ward is Transport Secretary and, as such, if the proposals to the mitigation of the insult to Eltham that we see are not respected, then we cannot accept that our MP is doing anything other than negatively impacting her own electorate.  
I know I will not be supporting her as I have in the past.

We need the maximisation of natural content in the new "Airport" environment.

Maybe when the new link is in place we can also grass over the excess concrete that the link will highlight.

## SUBMISSION TO NILLUMBİK SHIRE COUNCIL ON THE ELTHAM GATWEWAY PROJECT

To: Nillumbik Shire Council (Attention: Participate Nillumbik and Rowena Cairns)

By email: nillumbik@nillumbik.vic.gov.au

### DETAILS OF SUBMITTER:

Name:

Contact details:

- Postal address:

- Email address:

### SUBMISSION

I have not completed the survey on Participate Nillumbik because I felt that the questions were, in many cases, too restrictive and also required a response to something that was not explained in sufficient detail, such as "Structured indigenous planting". However, to facilitate comparing my comments with the survey questions, I have taken the basic premise of each question and commented on these as set out below.

I have **attached** a draft concept plan that I drew as a talking point when SGRG had initial discussions with Vicki Ward and representatives of Major Road Projects Victoria in relation to creating a new gateway to Eltham to replace the former treed roundabout at the intersection of Fitzsimons Lane and Main Road. One idea that Vicki proposed was to create a "yarning circle" and my concept plan (**Sketch**) took up that idea. The Sketch is not to scale and has no particular merit. I have attached it because it ties in with the old adage that "A picture is worth a thousand words" and enables me to explain parts of my submission by reference to the Sketch.

### What do you like most about the Eltham Gateway Conceptual Master Plan (in a few words)?

It will hopefully rehabilitate an area that is overgrown and full of weeds (Area A) and create somewhere that clearly indicates, by appropriate planting in Areas B and C, that you are entering Eltham's treed environment.

### AREA A

1. Within Area A, which parts of the conceptual master plan appeal to you the most? (Instead of ranking these in my order of preference I have inserted comments in brackets after each item and expanded on these in my Comments on Q1 below.)

**Looped Pathway** (reduce to one or two shorter paths within the Degraded Area (as defined below))

**Meeting Circle** (enlarge and change seating type)

**Spiral Path** (remove)

**Seating** (this should be the "bench seating" shown in a photograph on the right hand side of the Master plan (as defined below))

**Indigenous/edible garden** (reduce size and put edible plants beside a path as explained at b) below)

**Log steppers/balance logs** (OK in the circumstances set out in d) below. However, if it is necessary to scale back the concept owing to budgetary constraints and I had to list my preferences, this would be close to the bottom of that list.)

**The Structured indigenous planting** (I am not sure what this means. The Degraded Area requires planting and this should be mainly with local indigenous plants. However, the Native Area (as defined below) should be left untouched, except to remove weeds and invasive plants, and returned to as natural a state as is feasible.)

**Mix of steel/timber fence** (remove or retain only where essential for safety reasons - see e) and d) below.)

#### COMMENT ON Q1.

The original concept was to preserve as much as possible of the native habitat and remove the invasive plants and weeds. This area would then consist of indigenous plants such as native grasses and Dichondra. Other mid storey plants that were already growing in that area were to be retained unless there was a good reason to remove them and perhaps plant replacements in a better location. The part of Area A envisaged by this concept corresponds generally with the area identified as "revegetation Indigenous natural planting" on the Conceptual Draft Plan by Indigenous Design on the Participate Nillumbik webpage (**Master plan**). However, the description of "revegetation Indigenous natural planting" suggests that this part of Area A may be subject to more human intervention than was originally considered. Hopefully this is not the case and only minimal intervention will take place in order to rehabilitate the majority of Area A.

Despite the above, it was recognised that the part of Area A close to the drain where there are several pine trees and elms that have suckered was very degraded and full of weeds (**Degraded Area**). As this needed major remedial works, the concept was to create an area that could be landscaped according to the preference of the local community. One possible use was as a yarning circle and I expanded on this idea in the Sketch.

The loop path, spiral with edible garden and meeting circle seem to potentially cover an area greater than the Degraded Area. If this is correct I would like to see the landscaping component of the Master plan scaled back so it only sits within the Degraded Area.

I also feel that the following elements of the Master Plan do not reflect the original concept or the results of Vicki Ward's community survey about what people would like to see in Areas A, B, and C:

##### a) *the loop path.*

Some people have expressed a preference for a single path leading into the Degraded Area so as to minimise disturbance of the parts of Area A that are outside the Degraded Area (**Native Area**). This could be in the form of a short path from the "existing bitumen pathway" shown on the Master plan positioned roughly opposite the bus stop. Alternatively, there could be two short paths going in and out of the Degraded Area in a similar way to the "new paths" marked 1) and 2) in the Sketch.

##### b) *the spiral and the edible garden.*

I don't see the point of having a spiral path that leads nowhere and seems likely to be costly to maintain. Also, the edible garden seems to cover a very large area. I query whether there are enough different types of edible indigenous plants to fill this area. I would prefer there to

be edible plants in a smaller area set beside a path such as the loop path or its replacement. This edible plant area should contain signs that describe and name the edible plants and explain how they were used by the Wurrundjeri, as seems to be envisaged by the reference to "edible garden with informative signage" on the Master plan.

c) *the meeting circle.*

I like the idea of a meeting circle but wonder if it could be larger if the spiral is removed. The concept of a circle in the Sketch is of an area that is large enough to contain seating and be accessible to both wheelchairs and prams. The seating is spaced. I think that the idea of a "curved stone seat" on the Master plan is misconceived because Covid is now endemic and all seating should be socially distanced. Also, the respondents to Vicki Ward's survey expressed a preference for seating made of wood (including plastic wood), with a back. Therefore, bench seating should be used throughout, in which case the rocks at the entrance to the meeting circle that also seem to offer potential seating could be removed.

The meeting circle could be transformed into a garden where people could sit quietly to read or meet others. The Sketch envisaged that the circle would be surrounded by a small embankment with mudstone rocks (as mudstone, particularly the yellow form, looks more like Eltham shale) and native plants. Although the plants should mainly be local indigenous plants, some other plants native to Victoria could also be used, for example, some more attractive Grevilleas are not indigenous to Nillumbik.

A garden that uses water-wise plants that attract birds and insects could be used as a means of encouraging locals to use such plants in their own gardens in preference to exotic plants. Planting to provide a variety of shapes and lots of colour would be more likely to inspire people.

The Sketch refers to both a medium plant zone and a small plant zone. The medium plants could be Correas, Pimeleas and Grevilleas and the small plants could range from medium to low height species of grasses (like Microlaena), Dianella, button everlastings and straw daisies to ground covers such as Brachyscome and Kennedia prostrata.

At the back of the circle, to screen it from the drain (and possibly also as screening from the sight and sound of Main Rd without making the circle dangerously secluded), Rio/REO mesh could be used as a frame for native climbers, such as those listed on the Sketch, and is comparatively cheap.

I believe that all the plants listed above are available as tube stock from Edendale, with the possible exception of some of the more attractive Grevilleas.

I assume from looking at the "carved tree stump" noted on the Master plan at the start of the spiral path, that the meeting circle is quite close to the drain. I think the circle should be moved slightly closer to the road if this would be a safer distance from the drain.

d) *log steppers/balance logs.*

If there is general support for having these in the southern part of Area A, as shown on the Master plan, as a natural play area for children and Council does not have any concerns regarding their safety, I have no objection to these being included in the Master plan (particularly if they re-use timber from the removed pine trees).

This could be a location where fencing is actually needed to keep children from straying into the path of oncoming cyclists or onto Main Rd.

e) *mix of steel/timber fence.*

I do not see why a fence is needed next to the existing bitumen pathway. This seems likely to be expensive in terms of both its construction and the ongoing maintenance of the area next to it (because you cannot mow right up to a fence). If it is required for safety reasons, I hope that its length can be drastically reduced and it can be built from some of the timber from the pine trees referred to in question 6.

The photos on the right hand side of the Master plan in the second line from the top have a fence that seems to contain sections of blue and yellow glass. I do not think that this is reflective of Eltham and would prefer a wooden fence. If the fence is to be metal, it should be in the style of the decorative fencing in Eltham Town Centre or as shown in the **attached** photo of some basic metal safety fencing at the edge of the reserve in Grove St opposite the Eltham East Primary School that has been made much more attractive by growing Hardenbergia on it.

**2. Area A proposes a looped circuit path - do you prefer this or a north/south linear path or other?**

See 1 a)

**3. Would you like to include an indigenous (Wurundjeri) garden?**

I think that the use of local indigenous plants establishes a sufficient connection to the Wurundjeri. However, the edible garden that I would like to be scaled back, as explained at 1b), would be a good way of providing more information about the traditional way of life of the Wurundjeri.

**4. Would you like the meeting circle with seating types to be included in the final design?**

Yes. See 1c).

**5. Would you like the proposed steel and mixed timber fence along Main Rd to be part of the final design?**

No, except as explained at 1e).

**6. Should re-used timber (from the removed pine trees) be included in the final plan and used for a combination of log steppers, balance beams, tee pees and sculptured play items?**

I favour the re-use of timber from these pine trees but not necessarily for these uses. I understand that this timber could be used for fencing and boardwalks. Please also see 1d).

**7. Should the stumps of the two Cypress pine trees to be removed be re-purposed in situ as legacy carvings, seats or other items?**

Yes. I would like to see carvings reflective of the local flora and fauna. The Fairy Tree in the Fitzroy Gardens includes a kookaburra, reptiles and native animals. Something similar that includes only flora and fauna found in Nillumbik could be appropriate.

**OTHER COMMENTS ON AREA A**

I think that there needs to be some form of fence or other barrier next to the drain and the Diamond Creek to prevent people from going too close to the edge. However, there needs to be enough room between the fence and the banks to allow weeds to be safely controlled along those banks.

There are a lot of rocks that seem to be located amongst grass. If this is the case, the rocks should not be placed in these locations because it is both awkward and expensive to trim grass around rocks. Rocks should be confined to embankments where they are needed to provide stability and can be surrounded by plants and mulch, not grass.

I also query why the rocks are basalt, as I believe that these are usually black or dark grey in colour and are not found locally. See my comment re mudstone at 1c).

#### **COMMENTS ON AREA B**

Generally I like the idea of landscaping to make this area more attractive. I have two reservations as follows:

1. I query if some of the rocks are on a flat, grassed area and will be difficult to maintain as referred to in my comments on Area A.
2. I note that Area B south is to have "low strappy Indigenous planting, tolerating boggy conditions. This is quite understandable but I hope that the planting will not be limited to a single plant species (as seems to have happened with a lot of local planting of Lomandra). I would like to see a wide variety of plants with lots of colour, as explained at 1c), where such plants are suited to the conditions in Area B. Planting that is more eye-catching will hopefully encourage locals to use similar designs and plants in their gardens. Several months ago I visited the Ivanhoe Library and was impressed with the landscaping at the front of the building.

#### **COMMENTS ON AREA C**

I like the idea of white trunked eucalypts and the future sculpture in Area C north.

Regarding the sculpture, one of my favourite local art works is "The Fences Act" at Edendale. I often show it to my visitors and they all love it. Something like this would reflect the preference expressed in Vicki Ward's survey primarily for wood and then metal, steel or iron. However, I also note that the main preference of respondents was for art influenced by indigenous history and representing local flora and fauna.

#### **OVERALL COMMENTS**

Although my above comments appear largely critical, I would like to say that I very much welcome Council's involvement in this project and willingness to create a new gateway to Eltham and Nillumbik that the community can be proud of. My hope is that this will create a lasting legacy that reflects Nillumbik's commitment to the natural environment and the importance of trees.

Submission #18

Dear [REDACTED]

Thank you for reengaging the community on what is a unique opportunity to create something beautiful and meaningful for Eltham residents and passersby.

I've opted for a written submission as I've found the Participate Nillumbik survey to be restrictive.

This submission builds on my original feedback provided on 2 December 2021 and ultimately supports the collective views expressed in the first round of community feedback: that Site A should be enhanced with indigenous plantings and involve minimal human impact.

This new gateway will be seen more by drivers than pedestrians and therefore the focus should be on the impression felt driving through the gateway. People want to feel a sense of calm as they enter Nillumbik, so I hope this project leads to less infrastructure and more rewilding.

SITE A DESIGN:

- I support the reuse of materials and appreciate the respect shown for First Nations culture
- I do not support the edible garden spiral path as it feels too manicured for the location and I would rather see funding used for additional indigenous planting. As expressed in original feedback, I'd be happy to participate in a community planting bee.
- A simple, natural style pathway that stays clear of the riparian zone and occupies less space would be more appropriate for those who wish to meander through.
- There are plenty of places for people to congregate in nearby Eltham Lower Park, Barak Bushlands etc. With this in mind, I would rather see Site A remain a passive and bushy site rather than an active playground / meeting place. A simple bench for quiet contemplation would suffice, but even then I don't know how quiet the contemplation would be given how close the site is to Main Rd! If the meeting circle remains, it should be smaller to allow for more intimate conversations and be far from the riparian zone.
- Funding for a fence may be better placed along the back side of Site A to discourage further erosion from foot traffic, rather than the current positioning outlined in the master plan. A simple railing along the pathway above the creek bend (see photo below) may also be required to provide a safer passage and avoid curious kids getting too close to the steep edge.

EROSION:

[REDACTED] I can advise that this section of the creek has extensive erosion (previously flagged with Vicki Ward MP / Melbourne Water and showcased in photo below). Given how close this section of the creek is to Main Road, I believe the surrounding land - Site A - needs to be protected from any unnecessary foot traffic or damage.

**WILDLIFE:**

My family, alongside others living [REDACTED] have spent years revegetating this section of the creek. We recognise this area as being a sensitive and important waterway for local wildlife and hope this project can further rewild the area.

Neighbours who have lived on the floodplain for 30-40 years have cited platypus burrowing in the creek bank nearby (we have also spotted one in the water since moving here a few years ago) as well as tortoises laying eggs in the area. Melbourne Water have previously engaged residents on a wildlife survey and discovered wombats, echidnas, hopping mice, more than 100 birds etc along the creek - I do not have a copy of this study but would encourage you to consider the critical role this area plays in providing wildlife habitat.

**TREES:**

I understand that this regeneration project will require some tree removal in order to execute the longer term vision, but I would appreciate some more information regarding the 33 trees that have been identified as requiring removal. Is there a map (beyond the yellow dotted one below) that indicates which trees are to be removed? Are any of the gum trees going, or just the invasive / non-native species?

I would also appreciate some clarity as to whether a tree would “provide significant future risk if left in place” namely because the site (Site A in particular) is being proposed as a more active space that encourages human activity rather than being kept as passive bushland?

Thank you for taking my feedback into consideration, I look forward to receiving responses to my questions posed as well as revised plans that capture wider community sentiment.

Kindest
