Acknowledgement of Country

Nillumbik Shire Council acknowledges the Wurundjeri Woi-wurrung people as the Traditional Owners of the Country on which Nillumbik is located. We pay our respects to Elders past, present and future, and extend that respect to all First Nations People. We respect the enduring strength of the Wurundjeri Woi-wurrung and acknowledge that sovereignty was never ceded.

1. Purpose

The purpose of the Revenue and Rating Plan is to determine the rating and revenue strategy which, in conjunction with other income sources, will adequately finance the objectives proposed in the Council Plan.

2. Summary

Nillumbik Shire Council requires sufficient revenue to maintain its service delivery needs and fund its infrastructure needs. The most important sources of these funds are:

- general rates
- government grants
- fees and charges.

General Rates are levied annually, in compliance with the Fair Go Rating System.

Council advocacy is an ongoing priority to obtain external grant funds, particularly for community infrastructure capital works programs.

Council has reviewed all fees and charges and increased/decreased the levels consistent with application of the user pays principle – that is, so far as is possible, the cost of providing a direct service will be met by the fees charged.

A schedule of the current user fees and charges is presented in the annual budget. Also included is a selection of council services and their costs compared to the income received for their provision.

3. General Rates Income

General Rates are levied annually, in compliance with the Fair Go Rating System, the *Local Government Act 1989* and the *Local Government Act 2020*.

The Fair Go Rates System (FGRS) sets out the maximum amount councils may increase rates in a year. The cap applies to general rates and is calculated on the basis of council's average rates and charges.

The rating system is based on property valuations, which are carried out annually by the Valuer-General Victoria or their nominated representatives. Rates are levied based on these valuations.

Council has several means by which it can vary the amounts which are levied, including:

- a general rate
- a municipal charge
- differential rates
- service rates and charges
- special rates and charges
- rebates, deferments, concessions and exemptions.

Several propositions are considered in developing the most suitable rating system. This entailed giving consideration to a number of factors, such as:

- equity of the system
- efficiency of application
- the link between rate levied and benefit to be derived.
- the valuation base of rates
- A differential rating system with and without a municipal charge
- The use of rebates and deferment schemes
- Policy approaches for exemptions and concessions
- Rating of cultural and recreational land.

3.1 Valuation Base

In raising Council rates, Council is required to use the valuation of the rateable property to levy rates, with the valuation updated annually.

The *Local Government Act 2020* (the Act) permits councils to use three valuation basis; Site Value (SV), Capital Improved Value (CIV) and Net Annual Value (NAV).

Capital Improved Value – the total market value of the land plus buildings and other improvements.

Net Annual Value – the current value of a property's net annual rent (by law, Net Annual Value must be at least 5% of the Capital Improved Value for commercial property and exactly 5% of Capital Improved Value for residential property).

Site Value – the market value of the land only.

Capital Improved Value (CIV) better reflects capacity to pay than the other two bases as it incorporates the developed value of properties i.e. the total value. Most Victorian councils use the Capital Improved Value to levy rates.

Basis of Valuation

The basis of valuation currently used by Nillumbik is the Capital Improved Value (CIV), in compliance with the Fair Go Rates System and the Act.

3.2 Differential rates

Differential rates are where councils set different rates in the dollar for different categories of rateable land. Councils are able to levy either a uniform rate across all properties, or one or more differential rates. Council may, for example, have differential rates for farm land, various categories of residential property or commercial/industrial properties – each paying a higher or lower rate in the dollar.

Differential rates are usually used to achieve greater equity or efficiency.

The highest differential rate cannot be more than four times the lowest differential rate declared by a council.

Details of the objectives of each differential rate, the types of classes of land, which are subject to each differential rate and the uses of each differential rate, are set out below.

Commercial land - any land used for commercial purposes.

Occupied for the principal purpose of carrying out the trade in goods and services or unoccupied but zoned commercial under the State Planning Scheme

Industrial – any land used for industrial purposes

Occupied for the principal purpose of carrying out the manufacture or production of or unoccupied but zoned industrial under the State Planning Scheme.

Farm land – Land not less than two hectares in area; that is used primarily for grazing (including agistment), dairying, pig-farming, poultry-farming, tree farming, bee-keeping, viticulture, horticulture, fruit-growing or the growing of crops of any kind or for any combination of those activities; that is used by a business.

Land that has a significant and substantial commercial purpose or character; and that seeks to make a profit on a continuous or repetitive basis from its activities on the land; and that is making a profit from its activities on the land, or that has a reasonable prospect of making a profit from its activities on the land if it continues to operate in the way that it is operating.

Farm land with Sustainable Agriculture Rebate – Used by the applicant for a single farm enterprise must comprise and aggregate of a minimum 30 hectares;

The property in respect of which the rebate is sought is classified as Farm Land; the applicant shall satisfy detailed criteria relating to sustainable farming practices and land care principles as developed by Council.

Other land – Unoccupied land which is not farm land, commercial/industrial land or vacant land - residential and specified low density residential zones.

Vacant Land – Residential and Specified Low Density Residential Zones

General Residential / Activity Centre Zone / Neighbourhood Residential Zones and Low Density Residential Zones (LDRZ) to which Development Planning Overlay 4 applies, on which no habitable dwelling exists.

Lots greater than 8,000 square metres in the Plenty LDRZ are excluded.

This is a higher differential to encourage construction of new dwellings in preferred locations across the Shire.

Rateable land under this definition includes Vic Roads land that is not used for transport or for residential properties.

Cultural and Recreational Land – Council is required to determine an amount payable as rates in respect to recreational lands.

Recreational lands are described as lands which are:

- Vested in or occupied by a body-corporate or un-incorporate which exists for the purpose of providing or promoting cultural or sporting recreational facilities or objectives.
- Which applies its profits in promoting its objectives and prohibits the payment of dividend or amount to members used for outdoor sporting recreational or cultural purposes or similar outdoor activities.

3.3 Proposed rating system

Rate in the dollar, proposed draft budget 2025-2026

Type or class of land	2025-26 Rate in Dollar
General	0.002378
Farm Land	0.002021
Commercial/Industrial	0.002758
Vacant Land - Residential and Specified Low Density Residential Zones	0.003531
Cultural and Recreational Land	0.000927

** rate in the dollar values to be updated once total value of each type or class of land has been verified by the Valuer-General.*

Rates levied, proposed draft budget 2025-2026

Rate Type	No.	Capital Improved Value 000'	Share of Capital Improved Value
Residential	22,910	25,500,938	94.19%
Farm Land	144	301,525	1.11%
Commercial / Industrial	1,003	1,097,185	4.05%
Vacant Land - Residential and Specified Low Density Residential Zones	220	167,985	0.62%
Cultural and Recreational Land	2	5,100	0.02%
Total	24,279	27,072,733	100%

** total rates by class may vary once valuations have been verified by the Valuer-General.*

Past and proposed rate levels

Year	Rates Levied	Assessments	Adopted % Increase	Rate Cap %	Rates per Assessment
2025-2026*	66,820,742	24,279	3.00%	3.00%	2,752.20
2024-2025	64,569,068	24,208	2.75%	2.75%	2,667.26
2023-2024	62,510,440	24,129	3.50%	3.50%	2,590.68
2022-2023	60,196,396	24,087	1.75%	1.75%	2,499.12
2021-2022	58,780,166	23,972	1.50%	1.50%	2,452.03

**2025-2026 proposed rates to be levied*

3.4 Supplementary Rates

Supplementary rates apply to properties where valuations and revaluations are conducted between general revaluations as a result of properties physically changing such as when a building is constructed, renovated, extended, altered or demolished. It may also apply when land is subdivided, amalgamated or portions are sold off or rezoned.

3.5 State Government Pensioner Rebate

Pensioners may qualify for a maximum 50% State Government rate rebate (to a gazetted maximum) for the home in which they are living. A rebate will apply for the Fire Services Property Levy. To be eligible, a ratepayer must hold one of the following concession cards:

- Pensioner Concession Card from Centrelink or Veterans' Affairs
- Gold Card from Department of Veterans Affairs specifying War Widow (WW) or Totally and Permanently Incapacitated (TPI).

Other than administrative costs this State Government Rebate scheme is cost neutral to Council as this is fully funded by the State Government.

3.6 Waste Service Charge

The waste management charge captures all known costs associated with the provision of the service.

Council's approach to the service charge is compliant with section 162 of the *Local Government Act 1989*. The Essential Services Commission is capturing the data on the waste management charge.

Currently the charge levied to residents captures the cost of service provision including known costs for the landfill rehabilitation sites.

The waste service charge levied is dependent on the level of service the ratepayer elects to receive.

Current and proposed waste service charges

Type of Charge	2024-25 \$	2025-26 \$
Waste Management - Residential - Standard service	658.35	679.87
Waste Management - 80 litre landfill bin	526.68	543.90
Waste Management - 2 x 120 litre landfill bin	921.69	951.82
Waste Management - 140 litre landfill bin - fortnightly collection	724.19	747.86
Waste Management - 120 litre landfill bin – weekly collection	1,185.03	1,223.77
Waste Management - Elderly persons units - bin	164.59	169.97

3.7 Rate instalment due dates

Rates and charges are due on a quarterly instalment basis. The due dates for the 2025-26 financial year will be:

- 30 September 2025,
- 30 November 2025,
- 28 February 2026 and
- 31 May 2026

(if any of these dates fall on a weekend, the due date will be the following Monday).

3.8 Rates – summary

In council's view the proposed revenue and rating strategy puts due emphasis on equity. The budget projections have been prepared on the basis of a 3.00 percent rate increase in 2025-2026 followed by increases of 3.00 percent in each of the following years.

4. Fees and Charges

Council provides a wide range of services, to the community, often for a fee or charge. The nature of these fees and charges generally depends on whether they relate to compulsory or discretionary services. Some of these, such as statutory planning fees, are set by state government statute and are commonly known as 'regulatory fees'. In these cases, councils usually have no control over service pricing.

The *Local Government Act 1989* gives Council the power to set these fees and charges at a level that recovers the full cost of providing the services, unless there is an overriding policy or imperative in favour of subsidisation.

A schedule of the current user fees and charges is presented in Council's annual budget. Council periodically reviews all fees and charges and adjusts the levels consistent with application of the user pays principle – the cost of providing a direct service will be met by the fees charged where possible.

4.1 Principles

Council has developed a range of principles to determine the level of fees and charges to be applied to each service. These principles are:

- Fees and charges are set in line with other like services through benchmarking.
- Fees and charges are set at a level that is deemed to be fair and equitable to enable the majority of residents to access the services.
- Full cost or direct cost recovery is achieved where possible.
- Fees are charged in line with State or Federal government legislation or Local Laws.
- Fees are charged in line with State or Federal government funding requirements.
- Fees and charges are comparable to private industry.

4.2 Full Service Costing

Cost recovery

Setting fees and charges is often determined by a notion that the fee charged for a service should correspond with the cost of providing the service; that is, the costs borne by the council are fully recovered.

Council operations attracting fees and charges

All council services are reviewed to assess whether they are appropriate to attract user fees and charges. Attributes of a service that can affect the ability for a council to place a fee or charge include whether the operation is a public or private good in nature and if there is any state & federal government legislation or funding conditions prohibiting or setting ceilings for pricing. Examples of such charges are found below:

Examples of council fees and charges

Area	Significant or typical fee or charge	Examples of Constraints
Business and Economic	Planning application fees	Many fee levels set by Victorian Government
Traffic and Streets	Parking fees and fines	Nil
Recreation and Culture	Leisure centre entrance fees	Competition (if any) from other centres
	Library fees	Basic services free as condition of State Government funding
Family and Community	Child care centres	Constraints from funding agreements
		Competition from private providers
	Maternal and child health	Basic services free as part of State Government funding
Waste Management	Kerbside collection fees	Nil
	Tip disposal fees	Influenced by Environment Protection Act 1970 provisions
Aged and Disabled	HACC services fees	Maximums set by State Government
Governance	Local Laws fees or fines	Related to penalty units set annually by State Government

Full cost

The full cost of delivering a service or providing a facility include both:

- **direct costs** – those costs that can be readily and unequivocally attributed to a service or activity because they are incurred exclusively for that particular product/activity
- **indirect Costs (often referred to as overheads)** – those costs that are not directly attributable to an activity, but support a range of activities across the council.

Direct Costs

Council has systems for calculating the direct costs of providing services. These include:

- labour – the wages and salaries of all staff directly working on the service.
- materials and supplies – supplies used in providing the service.
- capital equipment and assets used in providing the service – this may include plant hire or, where a council owns the equipment and assets, allowance for asset replacement and depreciation.

Indirect Costs

Every council has a range of back office operations that are not directly tied to any service delivery. Nonetheless, these involve real costs that are incurred in supporting the delivery of direct services. Two widely used methods to allocate indirect costs are:

- activity-based costing – links an organisation's outputs or goods and services to the activities used to produce them, and then assigns a cost to each output based on the rate of consumption of associated activities
- the pro-rata approach – allocates indirect costs on a proportionate basis by using measures that are easily available, such as staff involved in the activity as a percentage of total staff, or the service unit's share of total office space.

4.3 Pricing Policy

After a council has calculated the full costs of a service, another series of questions require answers before prices are decided. These include:

- Do any external constraints apply? Possibilities include:
 - either the State or Commonwealth Government sets a statutory price for that service; and if the service has private sector competitors AND is a “significant business activity”, the council needs to check competitive neutrality conditions. How would the service users respond to any price changes?
- Is a price based on the full cost of the service competitive with other suppliers (nearby councils and/or private competitors)?
- Does the council have a specific policy either:
 - to subsidise this service (setting prices below full costs)?
 - to use the service as a taxation mechanism (setting prices above the full cost level)?

If a competitive neutrality assessment is required, the following steps are recommended by the Victorian Government’s National Competition Policy (the Policy) and Local Government Statement:

- Determine whether the operation is a “significant business activity” and, therefore, subject to the policy
- Assess the full costs of providing the services, including all overheads
- Identify any aspect whereby the operation gains a net commercial benefit from being government owned.

If this analysis shows that a significant business does enjoy a net competitive benefit, the council is expected to set prices that include competitive neutral adjustments. However, under the policy this is not required if the council:

- decides that the costs of applying competitive neutrality outweigh the benefits
- conducts and documents a public interest test, which involves public consultation on costed options, and identifies clear public policy objectives for providing the service at below competitive neutral prices.

The policy aims to identify subsidies, make them transparent to the community, and explain why the council is providing cross-subsidisation. Cross-subsidisation implies that one group may pay higher/lower prices than another group. Cross-subsidisation exists in a number of forms:

- cross-subsidisation between the fees and charges paid by different users for a specific service – a cross subsidy between users
- cross-subsidisation between fees and charges and rates – a cross subsidy between users and ratepayers or from one service to another service
- cross-subsidisation between the amounts of rates paid by various classes of ratepayers.

The final step in a pricing policy is identifying what council services or service areas are “public goods” and therefore most appropriate for funding via general rate revenue. This need not be an exacting exercise, and as often noted, few council services fall exclusively into the public or private goods category. But it is important for a council to make recommendations that as far as possible allow judgements to be made and a rationale for pricing decisions to be expressed in the rating and revenue strategy.

The final step in a pricing policy is identifying what council services or service areas are “public goods” and therefore most appropriate for funding via general rate revenue.

5. Government Grants

Council pursues all avenues to obtain external grant funds for prioritised works. A large proportion (64%) of government grants is made up of the Financial Assistance Grants provided by the Commonwealth Government under the Local Government (Financial Assistance) Act 1995 (Commonwealth) and distributed annually to 79 local governing bodies within Victoria.

The Financial Assistance Grant program consists of two components:

- A general purpose component, which is distributed between the states and territories according to population (i.e., on a per capita basis), and
- An identified local road component, which is distributed between the states and territories according to fixed historical shares.

Both components of the grant are un-tied, allowing councils to spend the grants according to local priorities. Council applies the local roads component to road rehabilitation projects in its Capital Works Program, and utilises the general purpose component to fund Council operations and Capital works.

6. Other Income

Council receives income from other sources, including interest on investments, rent received, reimbursements and insurance refunds.

7. Review

The next review of this document is scheduled for completion by 30 June 2029 as part of the next Council Plan development process.
